International Accounting Standard 1

Presentation of Financial Statements

This version was issued in September 2007 and includes subsequent amendments resulting from IFRSs issued up to 30 November 2008. Its effective date is 1 January 2009.

IAS 1 *Presentation of Financial Statements* was issued by the International Accounting Standards Committee in September 1997. It replaced IAS 1 *Disclosure of Accounting Policies* (originally approved in 1974), IAS 5 *Information to be Disclosed in Financial Statements* (originally approved in 1977) and IAS 13 *Presentation of Current Assets and Current Liabilities* (originally approved in 1979).

In April 2001 the International Accounting Standards Board (IASB) resolved that all Standards and Interpretations issued under previous Constitutions continued to be applicable unless and until they were amended or withdrawn.

In December 2003 the IASB issued a revised IAS 1, and in August 2005 issued an Amendment to IAS 1—*Capital Disclosures*.

IAS 1 and its accompanying documents were also amended by the following IFRSs:

- IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* (issued March 2004)
- *Actuarial Gains and Losses, Group Plans and Disclosures* (Amendments to IAS 19) (issued December 2004)
- IFRS 7 *Financial Instruments: Disclosures* (issued August 2005)
- IAS 23 *Borrowing Costs* (as revised in March 2007).[1]

In September 2007 the IASB issued a revised IAS 1.

Since then, IAS 1 has been amended by the following IFRSs:

- *Puttable Financial Instruments and Obligations Arising on Liquidation* (Amendments to IAS 32 and IAS 1) (issued February 2008)[2]
- *Improvements to IFRSs* (issued May 2008).[3]

The following Interpretations refer to IAS 1:

- SIC-7 *Introduction of the Euro* (issued May 1998 and subsequently amended)
- SIC-15 *Operating Leases—Incentives* (issued December 1998 and subsequently amended)
- SIC-25 *Income Taxes—Changes in the Tax Status of an Entity or its Shareholders* (issued December 1998 and subsequently amended)
- SIC-29 *Service Concession Arrangements: Disclosures* (issued December 2001 and subsequently amended)
- SIC-32 *Intangible Assets—Web Site Costs* (issued March 2002 and subsequently amended)
- IFRIC 1 *Changes in Existing Decommissioning, Restoration and Similar Liabilities* (issued May 2004)
- IFRIC 14 *IAS 19—The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction* (issued July 2007)
- IFRIC 15 *Agreements for the Construction of Real Estate* (issued July 2008)[4]
- IFRIC 17 *Distributions of Non-cash Assets to Owners* (issued November 2008).[5]

IMPLEMENTATION GUIDANCE

APPENDIX Amendments to guidance on other IFRSs

TABLE OF CONCORDANCE

International Accounting Standard 1 *Presentation of Financial Statements* (IAS 1) is set out in paragraphs 1–140 and the Appendix. All the paragraphs have equal authority. IAS 1 should be read in the context of its objective and the Basis for Conclusions, the *Preface to International Financial Reporting Standards* and the *Framework for the Preparation and Presentation of Financial Statements*. IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies in the absence of explicit guidance.

Introduction

IN1 International Accounting Standard 1 *Presentation of Financial Statements* (IAS 1) replaces IAS 1 *Presentation of Financial Statements* (revised in 2003) as amended in 2005. IAS 1 sets overall requirements for the presentation of financial statements, guidelines for their structure and minimum requirements for their content.

Reasons for revising IAS 1

IN2 The main objective of the International Accounting Standards Board in revising IAS 1 was to aggregate information in the financial statements on the basis of shared characteristics. With this in mind, the Board considered it useful to separate changes in equity (net assets) of an entity during a period arising from transactions with owners in their capacity as owners from other changes in equity. Consequently, the Board decided that all owner changes in equity should be presented in the statement of changes in equity, separately from non-owner changes in equity.

IN3 In its review, the Board also considered FASB Statement No. 130 *Reporting Comprehensive Income* (SFAS 130) issued in 1997. The requirements in IAS 1 regarding the presentation of the statement of comprehensive income are similar to those in SFAS 130; however, some differences remain and those are identified in paragraph BC106 of the Basis for Conclusions.

IN4 In addition, the Board's intention in revising IAS 1 was to improve and reorder sections of IAS 1 to make it easier to read. The Board's objective was not to reconsider all the requirements of IAS 1.

Main features of IAS 1

IN5 IAS 1 affects the presentation of owner changes in equity and of comprehensive income. It does not change the recognition, measurement or disclosure of specific transactions and other events required by other IFRSs.

IN6 IAS 1 requires an entity to present, in a statement of changes in equity, all owner changes in equity. All non-owner changes in equity (ie comprehensive income) are required to be presented in one statement of comprehensive income or in two statements (a separate income statement and a statement of comprehensive income). Components of comprehensive income are not permitted to be presented in the statement of changes in equity.

IN7 IAS 1 requires an entity to present a statement of financial position as at the beginning of the earliest comparative period in a complete set of financial statements when the entity applies an accounting policy retrospectively or makes a retrospective restatement, as defined in IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*, or when the entity reclassifies items in the financial statements.

IN8 IAS 1 requires an entity to disclose reclassification adjustments and income tax relating to each component of other comprehensive income. Reclassification adjustments are the amounts reclassified to profit or loss in the current period that were previously recognised in other comprehensive income.

IN9 IAS 1 requires the presentation of dividends recognised as distributions to owners and related amounts per share in the statement of changes in equity or in the notes. Dividends are distributions to owners in their capacity as owners and the statement of changes in equity presents all owner changes in equity.

Changes from previous requirements

IN10 The main changes from the previous version of IAS 1 are described below.

A complete set of financial statements

IN11 The previous version of IAS 1 used the titles 'balance sheet' and 'cash flow statement' to describe two of the statements within a complete set of financial statements. IAS 1 uses 'statement of financial position' and 'statement of cash flows' for those statements. The new titles reflect more closely the function of those statements, as described in the *Framework* (see paragraphs BC14–BC21 of the Basis for Conclusions).

IN12 IAS 1 requires an entity to disclose comparative information in respect of the previous period, ie to disclose as a minimum two of each of the statements and related notes. It introduces a requirement to include in a complete set of financial statements a statement of financial position as at the beginning of the earliest comparative period whenever the entity retrospectively applies an accounting policy or makes a retrospective restatement of items in its financial statements, or when it reclassifies items in its financial statements. The purpose is to provide information that is useful in analysing an entity's financial statements (see paragraphs BC31 and BC32 of the Basis for Conclusions).

Reporting owner changes in equity and comprehensive income

IN13 The previous version of IAS 1 required the presentation of an income statement that included items of income and expense recognised in profit or loss. It required items of income and expense not recognised in profit or loss to be presented in the statement of changes in equity, together with owner changes in equity. It also labelled the statement of changes in equity comprising profit or loss, other items of income and expense and the effects of changes in accounting policies and correction of errors as 'statement of recognised income and expense'. IAS 1 now requires:

(a) all changes in equity arising from transactions with owners in their capacity as owners (ie owner changes in equity) to be presented separately from non-owner changes in equity. An entity is not permitted to present components of comprehensive income (ie non-owner changes in equity) in the statement of changes in equity. The purpose is to provide better information by aggregating items with shared characteristics and separating items with different characteristics (see paragraphs BC37 and BC38 of the Basis for Conclusions).

(b) income and expenses to be presented in one statement (a statement of comprehensive income) or in two statements (a separate income statement and a statement of comprehensive income), separately from owner changes in equity (see paragraphs BC49–BC54 of the Basis for Conclusions).

(c) components of other comprehensive income to be displayed in the statement of comprehensive income.

(d) total comprehensive income to be presented in the financial statements.

Other comprehensive income—reclassification adjustments and related tax effects

IN14 IAS 1 requires an entity to disclose income tax relating to each component of other comprehensive income. The previous version of IAS 1 did not include such a requirement. The purpose is to provide users with tax information relating to these components because the components often have tax rates different from those applied to profit or loss (see paragraphs BC65–BC68 of the Basis for Conclusions).

IN15 IAS 1 also requires an entity to disclose reclassification adjustments relating to components of other comprehensive income. Reclassification adjustments are amounts reclassified to profit or loss in the current period that were recognised in other comprehensive income in previous periods. The purpose is to provide users with information to assess the effect of such reclassifications on profit or loss (see paragraphs BC69–BC73 of the Basis for Conclusions).

Presentation of dividends

IN16 The previous version of IAS 1 permitted disclosure of the amount of dividends recognised as distributions to equity holders (now referred to as 'owners') and the related amount per share in the income statement, in the statement of changes in equity or in the notes. IAS 1 requires dividends recognised as distributions to owners and related amounts per share to be presented in the statement of changes in equity or in the notes. The presentation of such disclosures in the statement of comprehensive income is not permitted (see paragraph BC75 of the Basis for Conclusions). The purpose is to ensure that owner changes in equity (in this case, distributions to owners in the form of dividends) are presented separately from non-owner changes in equity (presented in the statement of comprehensive income).

International Accounting Standard 1
Presentation of Financial Statements

Objective

1 This Standard prescribes the basis for presentation of general purpose financial statements to ensure comparability both with the entity's financial statements of previous periods and with the financial statements of other entities. It sets out overall requirements for the presentation of financial statements, guidelines for their structure and minimum requirements for their content.

Scope

2 An entity shall apply this Standard in preparing and presenting general purpose financial statements in accordance with International Financial Reporting Standards (IFRSs).

3 Other IFRSs set out the recognition, measurement and disclosure requirements for specific transactions and other events.

4 This Standard does not apply to the structure and content of condensed interim financial statements prepared in accordance with IAS 34 *Interim Financial Reporting*. However, paragraphs 15–35 apply to such financial statements. This Standard applies equally to all entities, including those that present consolidated financial statements and those that present separate financial statements as defined in IAS 27 *Consolidated and Separate Financial Statements*.

5 This Standard uses terminology that is suitable for profit-oriented entities, including public sector business entities. If entities with not-for-profit activities in the private sector or the public sector apply this Standard, they may need to amend the descriptions used for particular line items in the financial statements and for the financial statements themselves.

6 Similarly, entities that do not have equity as defined in IAS 32 *Financial Instruments: Presentation* (eg some mutual funds) and entities whose share capital is not equity (eg some co-operative entities) may need to adapt the financial statement presentation of members' or unitholders' interests.

Definitions

7 The following terms are used in this Standard with the meanings specified:

***General purpose financial statements* (referred to as 'financial statements') are those intended to meet the needs of users who are not in a position to require an entity to prepare reports tailored to their particular information needs.**

***Impracticable* Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so.**

***International Financial Reporting Standards (IFRSs)* are Standards and Interpretations adopted by the International Accounting Standards Board (IASB). They comprise:**

(a) International Financial Reporting Standards;

(b) International Accounting Standards; and

(c) Interpretations developed by the International Financial Reporting Interpretations Committee (IFRIC) or the former Standing Interpretations Committee (SIC).

***Material* Omissions or misstatements of items are material if they could, individually or collectively, influence the economic decisions that users make on the basis of the financial statements. Materiality depends on the size and nature of the omission or misstatement judged in the surrounding circumstances. The size or nature of the item, or a combination of both, could be the determining factor.**

Assessing whether an omission or misstatement could influence economic decisions of users, and so be material, requires consideration of the characteristics of those users. The *Framework for the Preparation and Presentation of Financial Statements* states in paragraph 25 that 'users are assumed to have a reasonable knowledge of business and economic activities and accounting and a willingness to study the information with reasonable diligence.' Therefore, the assessment needs to take into account how users with such attributes could reasonably be expected to be influenced in making economic decisions.

Notes **contain information in addition to that presented in the statement of financial position, statement of comprehensive income, separate income statement (if presented), statement of changes in equity and statement of cash flows. Notes provide narrative descriptions or disaggregations of items presented in those statements and information about items that do not qualify for recognition in those statements.**

Other comprehensive income **comprises items of income and expense (including reclassification adjustments) that are not recognised in profit or loss as required or permitted by other IFRSs.**

The components of other comprehensive income include:

(a) changes in revaluation surplus (see IAS 16 *Property, Plant and Equipment* and IAS 38 *Intangible Assets*);

(b) actuarial gains and losses on defined benefit plans recognised in accordance with paragraph 93A of IAS 19 *Employee Benefits*;

(c) gains and losses arising from translating the financial statements of a foreign operation (see IAS 21 *The Effects of Changes in Foreign Exchange Rates*);

(d) gains and losses on remeasuring available-for-sale financial assets (see IAS 39 *Financial Instruments: Recognition and Measurement*);

(e) the effective portion of gains and losses on hedging instruments in a cash flow hedge (see IAS 39).

Owners **are holders of instruments classified as equity.**

Profit or loss **is the total of income less expenses, excluding the components of other comprehensive income.**

Reclassification adjustments **are amounts reclassified to profit or loss in the current period that were recognised in other comprehensive income in the current or previous periods.**

Total comprehensive income **is the change in equity during a period resulting from transactions and other events, other than those changes resulting from transactions with owners in their capacity as owners.**

Total comprehensive income comprises all components of 'profit or loss' and of 'other comprehensive income'.

8 Although this Standard uses the terms 'other comprehensive income', 'profit or loss' and 'total comprehensive income', an entity may use other terms to describe the totals as long as the meaning is clear. For example, an entity may use the term 'net income' to describe profit or loss.

8A The following terms are described in IAS 32 *Financial Instruments: Presentation* and are used in this Standard with the meaning specified in IAS 32:

(a) puttable financial instrument classified as an equity instrument (described in paragraphs 16A and 16B of IAS 32)

(b) an instrument that imposes on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation and is classified as an equity instrument (described in paragraphs 16C and 16D of IAS 32).

Financial statements

Purpose of financial statements

9 Financial statements are a structured representation of the financial position and financial performance of an entity. The objective of financial statements is to provide information about the financial position, financial performance and cash flows of an entity that is useful to a wide range of users in making economic decisions. Financial statements also show the results of the management's stewardship of the resources entrusted to it. To meet this objective, financial statements provide information about an entity's:

(a) assets;

(b) liabilities;

(c) equity;

(d) income and expenses, including gains and losses;

(e) contributions by and distributions to owners in their capacity as owners; and

(f) cash flows.

This information, along with other information in the notes, assists users of financial statements in predicting the entity's future cash flows and, in particular, their timing and certainty.

Complete set of financial statements

10 **A complete set of financial statements comprises:**

(a) a statement of financial position as at the end of the period;

(b) a statement of comprehensive income for the period;

(c) a statement of changes in equity for the period;

(d) a statement of cash flows for the period;

(e) notes, comprising a summary of significant accounting policies and other explanatory information; and

(f) a statement of financial position as at the beginning of the earliest comparative period when an entity applies an accounting policy retrospectively or makes a retrospective restatement of items in its financial statements, or when it reclassifies items in its financial statements.

An entity may use titles for the statements other than those used in this Standard.

11 **An entity shall present with equal prominence all of the financial statements in a complete set of financial statements.**

12 As permitted by paragraph 81, an entity may present the components of profit or loss either as part of a single statement of comprehensive income or in a separate income statement. When an income statement is presented it is part of a complete set of financial statements and shall be displayed immediately before the statement of comprehensive income.

13 Many entities present, outside the financial statements, a financial review by management that describes and explains the main features of the entity's financial performance and financial position, and the principal uncertainties it faces. Such a report may include a review of:

(a) the main factors and influences determining financial performance, including changes in the environment in which the entity operates, the entity's response to those changes and their effect, and the entity's policy for investment to maintain and enhance financial performance, including its dividend policy;

(b) the entity's sources of funding and its targeted ratio of liabilities to equity; and

(c) the entity's resources not recognised in the statement of financial position in accordance with IFRSs.

14 Many entities also present, outside the financial statements, reports and statements such as environmental reports and value added statements, particularly in industries in which environmental factors are significant and when employees are regarded as an important user group. Reports and statements presented outside financial statements are outside the scope of IFRSs.

General features

Fair presentation and compliance with IFRSs

15 **Financial statements shall present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the *Framework*. The application of IFRSs, with additional disclosure when necessary, is presumed to result in financial statements that achieve a fair presentation.**

16 **An entity whose financial statements comply with IFRSs shall make an explicit and unreserved statement of such compliance in the notes. An entity shall not describe financial statements as complying with IFRSs unless they comply with all the requirements of IFRSs.**

17 In virtually all circumstances, an entity achieves a fair presentation by compliance with applicable IFRSs. A fair presentation also requires an entity:

(a) to select and apply accounting policies in accordance with IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*. IAS 8 sets out a hierarchy of authoritative guidance that management considers in the absence of an IFRS that specifically applies to an item.

(b) to present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information.

(c) to provide additional disclosures when compliance with the specific requirements in IFRSs is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance.

18 **An entity cannot rectify inappropriate accounting policies either by disclosure of the accounting policies used or by notes or explanatory material.**

19 **In the extremely rare circumstances in which management concludes that compliance with a requirement in an IFRS would be so misleading that it would conflict with the objective of financial statements set out in the *Framework*, the entity shall depart from that requirement in the manner set out in paragraph 20 if the relevant regulatory framework requires, or otherwise does not prohibit, such a departure.**

20 **When an entity departs from a requirement of an IFRS in accordance with paragraph 19, it shall disclose:**

(a) that management has concluded that the financial statements present fairly the entity's financial position, financial performance and cash flows;

(b) that it has complied with applicable IFRSs, except that it has departed from a particular requirement to achieve a fair presentation;

(c) the title of the IFRS from which the entity has departed, the nature of the departure, including the treatment that the IFRS would require, the reason why that treatment would be so misleading in the circumstances that it would conflict with the objective of financial statements set out in the *Framework*, and the treatment adopted; and

(d) for each period presented, the financial effect of the departure on each item in the financial statements that would have been reported in complying with the requirement.

21 **When an entity has departed from a requirement of an IFRS in a prior period, and that departure affects the amounts recognised in the financial statements for the current period, it shall make the disclosures set out in paragraph 20(c) and (d).**

22 Paragraph 21 applies, for example, when an entity departed in a prior period from a requirement in an IFRS for the measurement of assets or liabilities and that departure affects the measurement of changes in assets and liabilities recognised in the current period's financial statements.

23 **In the extremely rare circumstances in which management concludes that compliance with a requirement in an IFRS would be so misleading that it would conflict with the objective of financial statements set out in the *Framework*, but the relevant regulatory framework prohibits departure from the requirement, the entity shall, to the maximum extent possible, reduce the perceived misleading aspects of compliance by disclosing:**

(a) the title of the IFRS in question, the nature of the requirement, and the reason why management has concluded that complying with that requirement is so misleading in the circumstances that it conflicts with the objective of financial statements set out in the *Framework*; and

(b) for each period presented, the adjustments to each item in the financial statements that management has concluded would be necessary to achieve a fair presentation.

24 For the purpose of paragraphs 19–23, an item of information would conflict with the objective of financial statements when it does not represent faithfully the transactions, other events and conditions that it either purports to represent or could reasonably be expected to represent and, consequently, it would be likely to influence economic decisions made by users of financial statements. When assessing whether complying with a specific requirement in an IFRS would be so misleading that it would conflict with the objective of financial statements set out in the *Framework*, management considers:

(a) why the objective of financial statements is not achieved in the particular circumstances; and

(b) how the entity's circumstances differ from those of other entities that comply with the requirement. If other entities in similar circumstances comply with the requirement, there is a rebuttable presumption that the entity's compliance with the requirement would not be so misleading that it would conflict with the objective of financial statements set out in the *Framework*.

Going concern

25 **When preparing financial statements, management shall make an assessment of an entity's ability to continue as a going concern. An entity shall prepare financial statements on a going concern basis unless**

management either intends to liquidate the entity or to cease trading, or has no realistic alternative but to do so. When management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the entity's ability to continue as a going concern, the entity shall disclose those uncertainties. When an entity does not prepare financial statements on a going concern basis, it shall disclose that fact, together with the basis on which it prepared the financial statements and the reason why the entity is not regarded as a going concern.

26 In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but is not limited to, twelve months from the end of the reporting period. The degree of consideration depends on the facts in each case. When an entity has a history of profitable operations and ready access to financial resources, the entity may reach a conclusion that the going concern basis of accounting is appropriate without detailed analysis. In other cases, management may need to consider a wide range of factors relating to current and expected profitability, debt repayment schedules and potential sources of replacement financing before it can satisfy itself that the going concern basis is appropriate.

Accrual basis of accounting

27 An entity shall prepare its financial statements, except for cash flow information, using the accrual basis of accounting.

28 When the accrual basis of accounting is used, an entity recognises items as assets, liabilities, equity, income and expenses (the elements of financial statements) when they satisfy the definitions and recognition criteria for those elements in the *Framework*.

Materiality and aggregation

29 An entity shall present separately each material class of similar items. An entity shall present separately items of a dissimilar nature or function unless they are immaterial.

30 Financial statements result from processing large numbers of transactions or other events that are aggregated into classes according to their nature or function. The final stage in the process of aggregation and classification is the presentation of condensed and classified data, which form line items in the financial statements. If a line item is not individually material, it is aggregated with other items either in those statements or in the notes. An item that is not sufficiently material to warrant separate presentation in those statements may warrant separate presentation in the notes.

31 An entity need not provide a specific disclosure required by an IFRS if the information is not material.

Offsetting

32 An entity shall not offset assets and liabilities or income and expenses, unless required or permitted by an IFRS.

33 An entity reports separately both assets and liabilities, and income and expenses. Offsetting in the statements of comprehensive income or financial position or in the separate income statement (if presented), except when offsetting reflects the substance of the transaction or other event, detracts from the ability of users both to understand the transactions, other events and conditions that have occurred and to assess the entity's future cash flows. Measuring assets net of valuation allowances—for example, obsolescence allowances on inventories and doubtful debts allowances on receivables—is not offsetting.

34 IAS 18 *Revenue* defines revenue and requires an entity to measure it at the fair value of the consideration received or receivable, taking into account the amount of any trade discounts and volume rebates the entity allows. An entity undertakes, in the course of its ordinary activities, other transactions that do not generate revenue but are incidental to the main revenue-generating activities. An entity presents the results of such transactions, when this presentation reflects the substance of the transaction or other event, by netting any income with related expenses arising on the same transaction. For example:

(a) an entity presents gains and losses on the disposal of non-current assets, including investments and operating assets, by deducting from the proceeds on disposal the carrying amount of the asset and related selling expenses; and

(b) an entity may net expenditure related to a provision that is recognised in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and reimbursed under a contractual arrangement with a third party (for example, a supplier's warranty agreement) against the related reimbursement.

35 In addition, an entity presents on a net basis gains and losses arising from a group of similar transactions, for example, foreign exchange gains and losses or gains and losses arising on financial instruments held for trading. However, an entity presents such gains and losses separately if they are material.

Frequency of reporting

36 An entity shall present a complete set of financial statements (including comparative information) at least annually. When an entity changes the end of its reporting period and presents financial statements for a period longer or shorter than one year, an entity shall disclose, in addition to the period covered by the financial statements:

(a) the reason for using a longer or shorter period, and

(b) the fact that amounts presented in the financial statements are not entirely comparable.

37 Normally, an entity consistently prepares financial statements for a one-year period. However, for practical reasons, some entities prefer to report, for example, for a 52-week period. This Standard does not preclude this practice.

Comparative information

38 Except when IFRSs permit or require otherwise, an entity shall disclose comparative information in respect of the previous period for all amounts reported in the current period's financial statements. An entity shall include comparative information for narrative and descriptive information when it is relevant to an understanding of the current period's financial statements.

39 An entity disclosing comparative information shall present, as a minimum, two statements of financial position, two of each of the other statements, and related notes. When an entity applies an accounting policy retrospectively or makes a retrospective restatement of items in its financial statements or when it reclassifies items in its financial statements, it shall present, as a minimum, three statements of financial position, two of each of the other statements, and related notes. An entity presents statements of financial position as at:

(a) the end of the current period,

(b) the end of the previous period (which is the same as the beginning of the current period), and

(c) the beginning of the earliest comparative period.

40 In some cases, narrative information provided in the financial statements for the previous period(s) continues to be relevant in the current period. For example, an entity discloses in the current period details of a legal dispute whose outcome was uncertain at the end of the immediately preceding reporting period and that is yet to be resolved. Users benefit from information that the uncertainty existed at the end of the immediately preceding reporting period, and about the steps that have been taken during the period to resolve the uncertainty.

41 When the entity changes the presentation or classification of items in its financial statements, the entity shall reclassify comparative amounts unless reclassification is impracticable. When the entity reclassifies comparative amounts, the entity shall disclose:

(a) the nature of the reclassification;

(b) the amount of each item or class of items that is reclassified; and

(c) the reason for the reclassification.

42 When it is impracticable to reclassify comparative amounts, an entity shall disclose:

(a) the reason for not reclassifying the amounts, and

(b) the nature of the adjustments that would have been made if the amounts had been reclassified.

43 Enhancing the inter-period comparability of information assists users in making economic decisions, especially by allowing the assessment of trends in financial information for predictive purposes. In some circumstances, it is impracticable to reclassify comparative information for a particular prior period to achieve comparability with the current period. For example, an entity may not have collected data in the prior period(s) in a way that allows reclassification, and it may be impracticable to recreate the information.

44 IAS 8 sets out the adjustments to comparative information required when an entity changes an accounting policy or corrects an error.

Consistency of presentation

45 An entity shall retain the presentation and classification of items in the financial statements from one period to the next unless:

(a) it is apparent, following a significant change in the nature of the entity's operations or a review of its financial statements, that another presentation or classification would be more appropriate having regard to the criteria for the selection and application of accounting policies in IAS 8; or

(b) an IFRS requires a change in presentation.

46 For example, a significant acquisition or disposal, or a review of the presentation of the financial statements, might suggest that the financial statements need to be presented differently. An entity changes the presentation of its financial statements only if the changed presentation provides information that is reliable and more relevant to users of the financial statements and the revised structure is likely to continue, so that comparability is not impaired. When making such changes in presentation, an entity reclassifies its comparative information in accordance with paragraphs 41 and 42.

Structure and content

Introduction

47 This Standard requires particular disclosures in the statement of financial position or of comprehensive income, in the separate income statement (if presented), or in the statement of changes in equity and requires disclosure of other line items either in those statements or in the notes. IAS 7 *Statement of Cash Flows* sets out requirements for the presentation of cash flow information.

48 This Standard sometimes uses the term 'disclosure' in a broad sense, encompassing items presented in the financial statements. Disclosures are also required by other IFRSs. Unless specified to the contrary elsewhere in this Standard or in another IFRS, such disclosures may be made in the financial statements.

Identification of the financial statements

49 An entity shall clearly identify the financial statements and distinguish them from other information in the same published document.

50 IFRSs apply only to financial statements, and not necessarily to other information presented in an annual report, a regulatory filing, or another document. Therefore, it is important that users can distinguish information that is prepared using IFRSs from other information that may be useful to users but is not the subject of those requirements.

51 An entity shall clearly identify each financial statement and the notes. In addition, an entity shall display the following information prominently, and repeat it when necessary for the information presented to be understandable:

(a) the name of the reporting entity or other means of identification, and any change in that information from the end of the preceding reporting period;

(b) whether the financial statements are of an individual entity or a group of entities;

(c) the date of the end of the reporting period or the period covered by the set of financial statements or notes;

(d) the presentation currency, as defined in IAS 21; and

(e) the level of rounding used in presenting amounts in the financial statements.

52 An entity meets the requirements in paragraph 51 by presenting appropriate headings for pages, statements, notes, columns and the like. Judgement is required in determining the best way of presenting such information. For example, when an entity presents the financial statements electronically, separate pages are not always used; an entity then presents the above items to ensure that the information included in the financial statements can be understood.

53 An entity often makes financial statements more understandable by presenting information in thousands or millions of units of the presentation currency. This is acceptable as long as the entity discloses the level of rounding and does not omit material information.

Statement of financial position

Information to be presented in the statement of financial position

54 **As a minimum, the statement of financial position shall include line items that present the following amounts:**

(a) **property, plant and equipment;**

(b) **investment property;**

(c) **intangible assets;**

(d) **financial assets (excluding amounts shown under (e), (h) and (i));**

(e) **investments accounted for using the equity method;**

(f) **biological assets;**

(g) **inventories;**

(h) **trade and other receivables;**

(i) **cash and cash equivalents;**

(j) **the total of assets classified as held for sale and assets included in disposal groups classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*;**

(k) **trade and other payables;**

(l) **provisions;**

(m) **financial liabilities (excluding amounts shown under (k) and (l));**

(n) **liabilities and assets for current tax, as defined in IAS 12 *Income Taxes*;**

(o) **deferred tax liabilities and deferred tax assets, as defined in IAS 12;**

(p) **liabilities included in disposal groups classified as held for sale in accordance with IFRS 5;**

(q) **non-controlling interests, presented within equity; and**

(r) **issued capital and reserves attributable to owners of the parent.**

55 **An entity shall present additional line items, headings and subtotals in the statement of financial position when such presentation is relevant to an understanding of the entity's financial position.**

56 **When an entity presents current and non-current assets, and current and non-current liabilities, as separate classifications in its statement of financial position, it shall not classify deferred tax assets (liabilities) as current assets (liabilities).**

57 This Standard does not prescribe the order or format in which an entity presents items. Paragraph 54 simply lists items that are sufficiently different in nature or function to warrant separate presentation in the statement of financial position. In addition:

(a) line items are included when the size, nature or function of an item or aggregation of similar items is such that separate presentation is relevant to an understanding of the entity's financial position; and

(b) the descriptions used and the ordering of items or aggregation of similar items may be amended according to the nature of the entity and its transactions, to provide information that is relevant to an understanding of the entity's financial position. For example, a financial institution may amend the above descriptions to provide information that is relevant to the operations of a financial institution.

58 An entity makes the judgement about whether to present additional items separately on the basis of an assessment of:

(a) the nature and liquidity of assets;

(b) the function of assets within the entity; and

(c) the amounts, nature and timing of liabilities.

59 The use of different measurement bases for different classes of assets suggests that their nature or function differs and, therefore, that an entity presents them as separate line items. For example, different classes of property, plant and equipment can be carried at cost or at revalued amounts in accordance with IAS 16.

Current/non-current distinction

60 **An entity shall present current and non-current assets, and current and non-current liabilities, as separate classifications in its statement of financial position in accordance with paragraphs 66–76 except when a presentation based on liquidity provides information that is reliable and more relevant. When that exception applies, an entity shall present all assets and liabilities in order of liquidity.**

61 **Whichever method of presentation is adopted, an entity shall disclose the amount expected to be recovered or settled after more than twelve months for each asset and liability line item that combines amounts expected to be recovered or settled:**

(a) no more than twelve months after the reporting period, and

(b) more than twelve months after the reporting period.

62 When an entity supplies goods or services within a clearly identifiable operating cycle, separate classification of current and non-current assets and liabilities in the statement of financial position provides useful information by distinguishing the net assets that are continuously circulating as working capital from those used in the entity's long-term operations. It also highlights assets that are expected to be realised within the current operating cycle, and liabilities that are due for settlement within the same period.

63 For some entities, such as financial institutions, a presentation of assets and liabilities in increasing or decreasing order of liquidity provides information that is reliable and more relevant than a current/non-current presentation because the entity does not supply goods or services within a clearly identifiable operating cycle.

64 In applying paragraph 60, an entity is permitted to present some of its assets and liabilities using a current/non-current classification and others in order of liquidity when this provides information that is reliable and more relevant. The need for a mixed basis of presentation might arise when an entity has diverse operations.

65 Information about expected dates of realisation of assets and liabilities is useful in assessing the liquidity and solvency of an entity. IFRS 7 *Financial Instruments: Disclosures* requires disclosure of the maturity dates of financial assets and financial liabilities. Financial assets include trade and other receivables, and financial liabilities include trade and other payables. Information on the expected date of recovery of non-monetary assets such as inventories and expected date of settlement for liabilities such as provisions is also useful, whether assets and liabilities are classified as current or as non-current. For example, an entity discloses the amount of inventories that are expected to be recovered more than twelve months after the reporting period.

Current assets

66 **An entity shall classify an asset as current when:**

(a) it expects to realise the asset, or intends to sell or consume it, in its normal operating cycle;

(b) it holds the asset primarily for the purpose of trading;

(c) it expects to realise the asset within twelve months after the reporting period; or

(d) the asset is cash or a cash equivalent (as defined in IAS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

An entity shall classify all other assets as non-current.

67 This Standard uses the term 'non-current' to include tangible, intangible and financial assets of a long-term nature. It does not prohibit the use of alternative descriptions as long as the meaning is clear.

68 The operating cycle of an entity is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. When the entity's normal operating cycle is not clearly identifiable, it is assumed to be twelve months. Current assets include assets (such as inventories and trade receivables) that are sold, consumed or realised as part of the normal operating cycle even when they are not expected to be realised within twelve months after the reporting period. Current assets also include assets held primarily for the purpose of trading (examples include some financial assets classified as held for trading in accordance with IAS 39) and the current portion of non-current financial assets.

Current liabilities

69 **An entity shall classify a liability as current when:**

(a) it expects to settle the liability in its normal operating cycle;

(b) it holds the liability primarily for the purpose of trading;

(c) the liability is due to be settled within twelve months after the reporting period; or

(d) **the entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.**

An entity shall classify all other liabilities as non-current.

70 Some current liabilities, such as trade payables and some accruals for employee and other operating costs, are part of the working capital used in the entity's normal operating cycle. An entity classifies such operating items as current liabilities even if they are due to be settled more than twelve months after the reporting period. The same normal operating cycle applies to the classification of an entity's assets and liabilities. When the entity's normal operating cycle is not clearly identifiable, it is assumed to be twelve months.

71 Other current liabilities are not settled as part of the normal operating cycle, but are due for settlement within twelve months after the reporting period or held primarily for the purpose of trading. Examples are some financial liabilities classified as held for trading in accordance with IAS 39, bank overdrafts, and the current portion of non-current financial liabilities, dividends payable, income taxes and other non-trade payables. Financial liabilities that provide financing on a long-term basis (ie are not part of the working capital used in the entity's normal operating cycle) and are not due for settlement within twelve months after the reporting period are non-current liabilities, subject to paragraphs 74 and 75.

72 An entity classifies its financial liabilities as current when they are due to be settled within twelve months after the reporting period, even if:

(a) the original term was for a period longer than twelve months, and

(b) an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the financial statements are authorised for issue.

73 If an entity expects, and has the discretion, to refinance or roll over an obligation for at least twelve months after the reporting period under an existing loan facility, it classifies the obligation as non-current, even if it would otherwise be due within a shorter period. However, when refinancing or rolling over the obligation is not at the discretion of the entity (for example, there is no arrangement for refinancing), the entity does not consider the potential to refinance the obligation and classifies the obligation as current.

74 When an entity breaches a provision of a long-term loan arrangement on or before the end of the reporting period with the effect that the liability becomes payable on demand, it classifies the liability as current, even if the lender agreed, after the reporting period and before the authorisation of the financial statements for issue, not to demand payment as a consequence of the breach. An entity classifies the liability as current because, at the end of the reporting period, it does not have an unconditional right to defer its settlement for at least twelve months after that date.

75 However, an entity classifies the liability as non-current if the lender agreed by the end of the reporting period to provide a period of grace ending at least twelve months after the reporting period, within which the entity can rectify the breach and during which the lender cannot demand immediate repayment.

76 In respect of loans classified as current liabilities, if the following events occur between the end of the reporting period and the date the financial statements are authorised for issue, those events are disclosed as non-adjusting events in accordance with IAS 10 *Events after the Reporting Period*:

(a) refinancing on a long-term basis;

(b) rectification of a breach of a long-term loan arrangement; and

(c) the granting by the lender of a period of grace to rectify a breach of a long-term loan arrangement ending at least twelve months after the reporting period.

Information to be presented either in the statement of financial position or in the notes

77 An entity shall disclose, either in the statement of financial position or in the notes, further subclassifications of the line items presented, classified in a manner appropriate to the entity's operations.

78 The detail provided in subclassifications depends on the requirements of IFRSs and on the size, nature and function of the amounts involved. An entity also uses the factors set out in paragraph 58 to decide the basis of subclassification. The disclosures vary for each item, for example:

(a) items of property, plant and equipment are disaggregated into classes in accordance with IAS 16;

(b) receivables are disaggregated into amounts receivable from trade customers, receivables from related parties, prepayments and other amounts;

(c) inventories are disaggregated, in accordance with IAS 2 *Inventories*, into classifications such as merchandise, production supplies, materials, work in progress and finished goods;

(d) provisions are disaggregated into provisions for employee benefits and other items; and

(e) equity capital and reserves are disaggregated into various classes, such as paid-in capital, share premium and reserves.

79 An entity shall disclose the following, either in the statement of financial position or the statement of changes in equity, or in the notes:

(a) for each class of share capital:

(i) the number of shares authorised;

(ii) the number of shares issued and fully paid, and issued but not fully paid;

(iii) par value per share, or that the shares have no par value;

(iv) a reconciliation of the number of shares outstanding at the beginning and at the end of the period;

(v) the rights, preferences and restrictions attaching to that class including restrictions on the distribution of dividends and the repayment of capital;

(vi) shares in the entity held by the entity or by its subsidiaries or associates; and

(vii) shares reserved for issue under options and contracts for the sale of shares, including terms and amounts; and

(b) a description of the nature and purpose of each reserve within equity.

80 An entity without share capital, such as a partnership or trust, shall disclose information equivalent to that required by paragraph 79(a), showing changes during the period in each category of equity interest, and the rights, preferences and restrictions attaching to each category of equity interest.

80A If an entity has reclassified

(a) a puttable financial instrument classified as an equity instrument, or

(b) an instrument that imposes on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation and is classified as an equity instrument

between financial liabilities and equity, it shall disclose the amount reclassified into and out of each category (financial liabilities or equity), and the timing and reason for that reclassification.

Statement of comprehensive income

81 An entity shall present all items of income and expense recognised in a period:

(a) in a single statement of comprehensive income, or

(b) in two statements: a statement displaying components of profit or loss (separate income statement) and a second statement beginning with profit or loss and displaying components of other comprehensive income (statement of comprehensive income).

Information to be presented in the statement of comprehensive income

82 As a minimum, the statement of comprehensive income shall include line items that present the following amounts for the period:

(a) revenue;

(b) finance costs;

(c) share of the profit or loss of associates and joint ventures accounted for using the equity method;

(d) tax expense;

(e) a single amount comprising the total of:

(i) the post-tax profit or loss of discontinued operations and

(ii) the post-tax gain or loss recognised on the measurement to fair value less costs to sell or on the disposal of the assets or disposal group(s) constituting the discontinued operation;

(f) profit or loss;

(g) **each component of other comprehensive income classified by nature (excluding amounts in (h));**

(h) **share of the other comprehensive income of associates and joint ventures accounted for using the equity method; and**

(i) **total comprehensive income.**

83 **An entity shall disclose the following items in the statement of comprehensive income as allocations for the period:**

(a) **profit or loss for the period attributable to:**

(i) **non-controlling interests, and**

(ii) **owners of the parent.**

(b) **total comprehensive income for the period attributable to:**

(i) **non-controlling interests, and**

(ii) **owners of the parent.**

84 **An entity may present in a separate income statement (see paragraph 81) the line items in paragraph 82(a)–(f) and the disclosures in paragraph 83(a).**

85 **An entity shall present additional line items, headings and subtotals in the statement of comprehensive income and the separate income statement (if presented), when such presentation is relevant to an understanding of the entity's financial performance.**

86 Because the effects of an entity's various activities, transactions and other events differ in frequency, potential for gain or loss and predictability, disclosing the components of financial performance assists users in understanding the financial performance achieved and in making projections of future financial performance. An entity includes additional line items in the statement of comprehensive income and in the separate income statement (if presented), and it amends the descriptions used and the ordering of items when this is necessary to explain the elements of financial performance. An entity considers factors including materiality and the nature and function of the items of income and expense. For example, a financial institution may amend the descriptions to provide information that is relevant to the operations of a financial institution. An entity does not offset income and expense items unless the criteria in paragraph 32 are met.

87 **An entity shall not present any items of income or expense as extraordinary items, in the statement of comprehensive income or the separate income statement (if presented), or in the notes.**

Profit or loss for the period

88 **An entity shall recognise all items of income and expense in a period in profit or loss unless an IFRS requires or permits otherwise.**

89 Some IFRSs specify circumstances when an entity recognises particular items outside profit or loss in the current period. IAS 8 specifies two such circumstances: the correction of errors and the effect of changes in accounting policies. Other IFRSs require or permit components of other comprehensive income that meet the *Framework*'s definition of income or expense to be excluded from profit or loss (see paragraph 7).

Other comprehensive income for the period

90 **An entity shall disclose the amount of income tax relating to each component of other comprehensive income, including reclassification adjustments, either in the statement of comprehensive income or in the notes.**

91 An entity may present components of other comprehensive income either:

(a) net of related tax effects, or

(b) before related tax effects with one amount shown for the aggregate amount of income tax relating to those components.

92 **An entity shall disclose reclassification adjustments relating to components of other comprehensive income.**

93 Other IFRSs specify whether and when amounts previously recognised in other comprehensive income are reclassified to profit or loss. Such reclassifications are referred to in this Standard as reclassification adjustments. A reclassification adjustment is included with the related component of other comprehensive income in the period that the adjustment is reclassified to profit or loss. For example, gains realised on the disposal of available-for-sale financial assets are included in profit or loss of the current period. These amounts

may have been recognised in other comprehensive income as unrealised gains in the current or previous periods. Those unrealised gains must be deducted from other comprehensive income in the period in which the realised gains are reclassified to profit or loss to avoid including them in total comprehensive income twice.

94 An entity may present reclassification adjustments in the statement of comprehensive income or in the notes. An entity presenting reclassification adjustments in the notes presents the components of other comprehensive income after any related reclassification adjustments.

95 Reclassification adjustments arise, for example, on disposal of a foreign operation (see IAS 21), on derecognition of available-for-sale financial assets (see IAS 39) and when a hedged forecast transaction affects profit or loss (see paragraph 100 of IAS 39 in relation to cash flow hedges).

96 Reclassification adjustments do not arise on changes in revaluation surplus recognised in accordance with IAS 16 or IAS 38 or on actuarial gains and losses on defined benefit plans recognised in accordance with paragraph 93A of IAS 19. These components are recognised in other comprehensive income and are not reclassified to profit or loss in subsequent periods. Changes in revaluation surplus may be transferred to retained earnings in subsequent periods as the asset is used or when it is derecognised (see IAS 16 and IAS 38). Actuarial gains and losses are reported in retained earnings in the period that they are recognised as other comprehensive income (see IAS 19).

Information to be presented in the statement of comprehensive income or in the notes

97 When items of income or expense are material, an entity shall disclose their nature and amount separately.

98 Circumstances that would give rise to the separate disclosure of items of income and expense include:

(a) write-downs of inventories to net realisable value or of property, plant and equipment to recoverable amount, as well as reversals of such write-downs;

(b) restructurings of the activities of an entity and reversals of any provisions for the costs of restructuring;

(c) disposals of items of property, plant and equipment;

(d) disposals of investments;

(e) discontinued operations;

(f) litigation settlements; and

(g) other reversals of provisions.

99 An entity shall present an analysis of expenses recognised in profit or loss using a classification based on either their nature or their function within the entity, whichever provides information that is reliable and more relevant.

100 Entities are encouraged to present the analysis in paragraph 99 in the statement of comprehensive income or in the separate income statement (if presented).

101 Expenses are subclassified to highlight components of financial performance that may differ in terms of frequency, potential for gain or loss and predictability. This analysis is provided in one of two forms.

102 The first form of analysis is the 'nature of expense' method. An entity aggregates expenses within profit or loss according to their nature (for example, depreciation, purchases of materials, transport costs, employee benefits and advertising costs), and does not reallocate them among functions within the entity. This method may be simple to apply because no allocations of expenses to functional classifications are necessary. An example of a classification using the nature of expense method is as follows:

Revenue		X
Other income		X
Changes in inventories of finished goods and work in progress	X	
Raw materials and consumables used	X	
Employee benefits expense	X	
Depreciation and amortisation expense	X	
Other expenses	X	
Total expenses		(X)
Profit before tax		X

103 The second form of analysis is the 'function of expense' or 'cost of sales' method and classifies expenses according to their function as part of cost of sales or, for example, the costs of distribution or administrative activities. At a minimum, an entity discloses its cost of sales under this method separately from other expenses. This method can provide more relevant information to users than the classification of expenses by nature, but allocating costs to functions may require arbitrary allocations and involve considerable judgement. An example of a classification using the function of expense method is as follows:

Revenue	X
Cost of sales	(X)
Gross profit	X
Other income	X
Distribution costs	(X)
Administrative expenses	(X)
Other expenses	(X)
Profit before tax	X

104 An entity classifying expenses by function shall disclose additional information on the nature of expenses, including depreciation and amortisation expense and employee benefits expense.

105 The choice between the function of expense method and the nature of expense method depends on historical and industry factors and the nature of the entity. Both methods provide an indication of those costs that might vary, directly or indirectly, with the level of sales or production of the entity. Because each method of presentation has merit for different types of entities, this Standard requires management to select the presentation that is reliable and more relevant. However, because information on the nature of expenses is useful in predicting future cash flows, additional disclosure is required when the function of expense classification is used. In paragraph 104, 'employee benefits' has the same meaning as in IAS 19.

Statement of changes in equity

106 An entity shall present a statement of changes in equity showing in the statement:

(a) total comprehensive income for the period, showing separately the total amounts attributable to owners of the parent and to non-controlling interests;

(b) for each component of equity, the effects of retrospective application or retrospective restatement recognised in accordance with IAS 8; and

(c) [deleted]

(d) for each component of equity, a reconciliation between the carrying amount at the beginning and the end of the period, separately disclosing changes resulting from:

(i) profit or loss;

(ii) each item of other comprehensive income; and

(iii) transactions with owners in their capacity as owners, showing separately contributions by and distributions to owners and changes in ownership interests in subsidiaries that do not result in a loss of control.

107 An entity shall present, either in the statement of changes in equity or in the notes, the amount of dividends recognised as distributions to owners during the period, and the related amount per share.

108 In paragraph 106, the components of equity include, for example, each class of contributed equity, the accumulated balance of each class of other comprehensive income and retained earnings.

109 Changes in an entity’s equity between the beginning and the end of the reporting period reflect the increase or decrease in its net assets during the period. Except for changes resulting from transactions with owners in their capacity as owners (such as equity contributions, reacquisitions of the entity’s own equity instruments and dividends) and transaction costs directly related to such transactions, the overall change in equity during a period represents the total amount of income and expense, including gains and losses, generated by the entity’s activities during that period.

110 IAS 8 requires retrospective adjustments to effect changes in accounting policies, to the extent practicable, except when the transition provisions in another IFRS require otherwise. IAS 8 also requires restatements to correct errors to be made retrospectively, to the extent practicable. Retrospective adjustments and retrospective restatements are not changes in equity but they are adjustments to the opening balance of retained earnings, except when an IFRS requires retrospective adjustment of another component of equity. Paragraph 106(b) requires disclosure in the statement of changes in equity of the total adjustment to each component of equity resulting from changes in accounting policies and, separately, from corrections of errors. These adjustments are disclosed for each prior period and the beginning of the period.

Statement of cash flows

111 Cash flow information provides users of financial statements with a basis to assess the ability of the entity to generate cash and cash equivalents and the needs of the entity to utilise those cash flows. IAS 7 sets out requirements for the presentation and disclosure of cash flow information.

Notes

Structure

112 The notes shall:

(a) present information about the basis of preparation of the financial statements and the specific accounting policies used in accordance with paragraphs 117–124;

(b) disclose the information required by IFRSs that is not presented elsewhere in the financial statements; and

(c) provide information that is not presented elsewhere in the financial statements, but is relevant to an understanding of any of them.

113 An entity shall, as far as practicable, present notes in a systematic manner. An entity shall cross-reference each item in the statements of financial position and of comprehensive income, in the separate income statement (if presented), and in the statements of changes in equity and of cash flows to any related information in the notes.

114 An entity normally presents notes in the following order, to assist users to understand the financial statements and to compare them with financial statements of other entities:

(a) statement of compliance with IFRSs (see paragraph 16);

(b) summary of significant accounting policies applied (see paragraph 117);

(c) supporting information for items presented in the statements of financial position and of comprehensive income, in the separate income statement (if presented), and in the statements of changes in equity and of cash flows, in the order in which each statement and each line item is presented; and

(d) other disclosures, including:

(i) contingent liabilities (see IAS 37) and unrecognised contractual commitments, and

(ii) non-financial disclosures, eg the entity's financial risk management objectives and policies (see IFRS 7).

115 In some circumstances, it may be necessary or desirable to vary the order of specific items within the notes. For example, an entity may combine information on changes in fair value recognised in profit or loss with information on maturities of financial instruments, although the former disclosures relate to the statement of comprehensive income or separate income statement (if presented) and the latter relate to the statement of financial position. Nevertheless, an entity retains a systematic structure for the notes as far as practicable.

116 An entity may present notes providing information about the basis of preparation of the financial statements and specific accounting policies as a separate section of the financial statements.

Disclosure of accounting policies

117 An entity shall disclose in the summary of significant accounting policies:

(a) the measurement basis (or bases) used in preparing the financial statements, and

(b) the other accounting policies used that are relevant to an understanding of the financial statements.

118 It is important for an entity to inform users of the measurement basis or bases used in the financial statements (for example, historical cost, current cost, net realisable value, fair value or recoverable amount) because the basis on which an entity prepares the financial statements significantly affects users' analysis. When an entity uses more than one measurement basis in the financial statements, for example when particular classes of assets are revalued, it is sufficient to provide an indication of the categories of assets and liabilities to which each measurement basis is applied.

119 In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in IFRSs. An example is disclosure of whether a venturer recognises its interest in a jointly controlled entity using proportionate consolidation or the equity method (see IAS 31 *Interests in Joint Ventures*). Some IFRSs specifically require disclosure of particular accounting policies, including choices made by management between different policies they allow. For example, IAS 16 requires disclosure of the measurement bases used for classes of property, plant and equipment.

120 Each entity considers the nature of its operations and the policies that the users of its financial statements would expect to be disclosed for that type of entity. For example, users would expect an entity subject to income taxes to disclose its accounting policies for income taxes, including those applicable to deferred tax liabilities and assets. When an entity has significant foreign operations or transactions in foreign currencies, users would expect disclosure of accounting policies for the recognition of foreign exchange gains and losses.

121 An accounting policy may be significant because of the nature of the entity's operations even if amounts for current and prior periods are not material. It is also appropriate to disclose each significant accounting policy that is not specifically required by IFRSs but the entity selects and applies in accordance with IAS 8.

122 An entity shall disclose, in the summary of significant accounting policies or other notes, the judgements, apart from those involving estimations (see paragraph 125), that management has made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

123 In the process of applying the entity's accounting policies, management makes various judgements, apart from those involving estimations, that can significantly affect the amounts it recognises in the financial statements. For example, management makes judgements in determining:

(a) whether financial assets are held-to-maturity investments;

(b) when substantially all the significant risks and rewards of ownership of financial assets and lease assets are transferred to other entities;

(c) whether, in substance, particular sales of goods are financing arrangements and therefore do not give rise to revenue; and

(d) whether the substance of the relationship between the entity and a special purpose entity indicates that the entity controls the special purpose entity.

124 Some of the disclosures made in accordance with paragraph 122 are required by other IFRSs. For example, IAS 27 requires an entity to disclose the reasons why the entity's ownership interest does not constitute control, in respect of an investee that is not a subsidiary even though more than half of its voting or potential voting power is owned directly or indirectly through subsidiaries.IAS 40 *Investment Property* requires disclosure of the criteria developed by the entity to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of business, when classification of the property is difficult.

Sources of estimation uncertainty

125 An entity shall disclose information about the assumptions it makes about the future, and other major sources of estimation uncertainty at the end of the reporting period, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year. In respect of those assets and liabilities, the notes shall include details of:

(a) their nature, and

(b) their carrying amount as at the end of the reporting period.

126 Determining the carrying amounts of some assets and liabilities requires estimation of the effects of uncertain future events on those assets and liabilities at the end of the reporting period. For example, in the absence of recently observed market prices, future-oriented estimates are necessary to measure the recoverable amount of classes of property, plant and equipment, the effect of technological obsolescence on inventories, provisions subject to the future outcome of litigation in progress, and long-term employee benefit liabilities such as pension obligations. These estimates involve assumptions about such items as the risk adjustment to cash flows or discount rates, future changes in salaries and future changes in prices affecting other costs.

127 The assumptions and other sources of estimation uncertainty disclosed in accordance with paragraph 125 relate to the estimates that require management's most difficult, subjective or complex judgements. As the number of variables and assumptions affecting the possible future resolution of the uncertainties increases, those judgements become more subjective and complex, and the potential for a consequential material adjustment to the carrying amounts of assets and liabilities normally increases accordingly.

128 The disclosures in paragraph 125 are not required for assets and liabilities with a significant risk that their carrying amounts might change materially within the next financial year if, at the end of the reporting period, they are measured at fair value based on recently observed market prices. Such fair values might change materially within the next financial year but these changes would not arise from assumptions or other sources of estimation uncertainty at the end of the reporting period.

129 An entity presents the disclosures in paragraph 125 in a manner that helps users of financial statements to understand the judgements that management makes about the future and about other sources of estimation uncertainty. The nature and extent of the information provided vary according to the nature of the assumption and other circumstances. Examples of the types of disclosures an entity makes are:

(a) the nature of the assumption or other estimation uncertainty;

(b) the sensitivity of carrying amounts to the methods, assumptions and estimates underlying their calculation, including the reasons for the sensitivity;

(c) the expected resolution of an uncertainty and the range of reasonably possible outcomes within the next financial year in respect of the carrying amounts of the assets and liabilities affected; and

(d) an explanation of changes made to past assumptions concerning those assets and liabilities, if the uncertainty remains unresolved.

130 This Standard does not require an entity to disclose budget information or forecasts in making the disclosures in paragraph 125.

131 Sometimes it is impracticable to disclose the extent of the possible effects of an assumption or another source of estimation uncertainty at the end of the reporting period. In such cases, the entity discloses that it is reasonably possible, on the basis of existing knowledge, that outcomes within the next financial year that are different from the assumption could require a material adjustment to the carrying amount of the asset or liability affected. In all

cases, the entity discloses the nature and carrying amount of the specific asset or liability (or class of assets or liabilities) affected by the assumption.

132 The disclosures in paragraph 122 of particular judgements that management made in the process of applying the entity's accounting policies do not relate to the disclosures of sources of estimation uncertainty in paragraph 125.

133 Other IFRSs require the disclosure of some of the assumptions that would otherwise be required in accordance with paragraph 125. For example, IAS 37 requires disclosure, in specified circumstances, of major assumptions concerning future events affecting classes of provisions. IFRS 7 requires disclosure of significant assumptions the entity uses in estimating the fair values of financial assets and financial liabilities that are carried at fair value. IAS 16 requires disclosure of significant assumptions that the entity uses in estimating the fair values of revalued items of property, plant and equipment.

Capital

134 An entity shall disclose information that enables users of its financial statements to evaluate the entity's objectives, policies and processes for managing capital.

135 To comply with paragraph 134, the entity discloses the following:

(a) qualitative information about its objectives, policies and processes for managing capital, including:

- (i) a description of what it manages as capital;
- (ii) when an entity is subject to externally imposed capital requirements, the nature of those requirements and how those requirements are incorporated into the management of capital; and
- (iii) how it is meeting its objectives for managing capital.

(b) summary quantitative data about what it manages as capital. Some entities regard some financial liabilities (eg some forms of subordinated debt) as part of capital. Other entities regard capital as excluding some components of equity (eg components arising from cash flow hedges).

(c) any changes in (a) and (b) from the previous period.

(d) whether during the period it complied with any externally imposed capital requirements to which it is subject.

(e) when the entity has not complied with such externally imposed capital requirements, the consequences of such non-compliance.

The entity bases these disclosures on the information provided internally to key management personnel.

136 An entity may manage capital in a number of ways and be subject to a number of different capital requirements. For example, a conglomerate may include entities that undertake insurance activities and banking activities and those entities may operate in several jurisdictions. When an aggregate disclosure of capital requirements and how capital is managed would not provide useful information or distorts a financial statement user's understanding of an entity's capital resources, the entity shall disclose separate information for each capital requirement to which the entity is subject.

Puttable financial instruments classified as equity

136A For puttable financial instruments classified as equity instruments, an entity shall disclose (to the extent not disclosed elsewhere):

(a) summary quantitative data about the amount classified as equity;

(b) its objectives, policies and processes for managing its obligation to repurchase or redeem the instruments when required to do so by the instrument holders, including any changes from the previous period;

(c) the expected cash outflow on redemption or repurchase of that class of financial instruments; and

(d) information about how the expected cash outflow on redemption or repurchase was determined.

Other disclosures

137 An entity shall disclose in the notes:

(a) the amount of dividends proposed or declared before the financial statements were authorised for issue but not recognised as a distribution to owners during the period, and the related amount per share; and

(b) the amount of any cumulative preference dividends not recognised.

138 An entity shall disclose the following, if not disclosed elsewhere in information published with the financial statements:

(a) the domicile and legal form of the entity, its country of incorporation and the address of its registered office (or principal place of business, if different from the registered office);

(b) a description of the nature of the entity's operations and its principal activities;

(c) the name of the parent and the ultimate parent of the group; and

(d) if it is a limited life entity, information regarding the length of its life.

Transition and effective date

139 An entity shall apply this Standard for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity adopts this Standard for an earlier period, it shall disclose that fact.

139A IAS 27 (as amended in 2008) amended paragraph 106. An entity shall apply that amendment for annual periods beginning on or after 1 July 2009. If an entity applies IAS 27 (amended 2008) for an earlier period, the amendment shall be applied for that earlier period. The amendment shall be applied retrospectively.

139B *Puttable Financial Instruments and Obligations Arising on Liquidation* (Amendments to IAS 32 and IAS 1), issued in February 2008, amended paragraph 138 and inserted paragraphs 8A, 80A and 136A. An entity shall apply those amendments for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies the amendments for an earlier period, it shall disclose that fact and apply the related amendments to IAS 32, IAS 39, IFRS 7 and IFRIC 2 *Members' Shares in Co-operative Entities and Similar Instruments* at the same time.

139C Paragraphs 68 and 71 were amended by *Improvements to IFRSs* issued in May 2008. An entity shall apply those amendments for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies the amendments for an earlier period it shall disclose that fact.

Withdrawal of IAS 1 (revised 2003)

140 This Standard supersedes IAS 1 *Presentation of Financial Statements* revised in 2003, as amended in 2005.

Appendix
Amendments to other pronouncements

The amendments in this appendix shall be applied for annual periods beginning on or after 1 January 2009. If an entity applies this Standard for an earlier period, these amendments shall be applied for that earlier period. In the amended paragraphs, new text is underlined and deleted text is struck through.

* * * * *

The amendments contained in this appendix when this Standard was revised in 2007 have been incorporated into the relevant pronouncements published in this volume.

Approval by the Board of IAS 1 issued in September 2007

International Accounting Standard 1 *Presentation of Financial Statements* (as revised in 2007) was approved for issue by ten of the fourteen members of the International Accounting Standards Board. Professor Barth and Messrs Cope, Garnett and Leisenring dissented. Their dissenting opinions are set out after the Basis for Conclusions.

Basis for Conclusions on IAS 1 *Presentation of Financial Statements*

The International Accounting Standards Board revised IAS 1 Presentation of Financial Statements *in 2007 as part of its project on financial statement presentation. It was not the Board's intention to reconsider as part of that project all the requirements in IAS 1.*

For convenience, the Board has incorporated into this Basis for Conclusions relevant material from the Basis for Conclusions on the revision of IAS 1 in 2003 and its amendment in 2005. Paragraphs have been renumbered and reorganised as necessary to reflect the new structure of the Standard.

This Basis for Conclusions accompanies, but is not part of, IAS 1.

Introduction

BC1 The International Accounting Standards Committee (IASC) issued the first version of IAS 1 *Disclosure of Accounting Policies* in 1975. It was reformatted in 1994 and superseded in 1997 by IAS 1 *Presentation of Financial Statements*.[*] In 2003 the International Accounting Standards Board revised IAS 1 as part of the Improvements project and in 2005 the Board amended it as a consequence of issuing IFRS 7 *Financial Instruments: Disclosures*. In 2007 the Board revised IAS 1 again as part of its project on financial statement presentation. This Basis for Conclusions summarises the Board's considerations in reaching its conclusions on revising IAS 1 in 2003, on amending it in 2005 and revising it in 2007. It includes reasons for accepting some approaches and rejecting others. Individual Board members gave greater weight to some factors than to others.

The Improvements project—revision of IAS 1 (2003)

BC2 In July 2001 the Board announced that, as part of its initial agenda of technical projects, it would undertake a project to improve a number of standards, including IAS 1. The project was undertaken in the light of queries and criticisms raised in relation to the standards by securities regulators, professional accountants and other interested parties. The objectives of the Improvements project were to reduce or eliminate alternatives, redundancies and conflicts within standards, to deal with some convergence issues and to make other improvements. The Board's intention was not to reconsider the fundamental approach to the presentation of financial statements established by IAS 1 in 1997.

BC3 In May 2002 the Board published an exposure draft of proposed *Improvements to International Accounting Standards*, which contained proposals to revise IAS 1. The Board received more than 160 comment letters. After considering the responses the Board issued in 2003 a revised version of IAS 1. In its revision the Board's main objectives were:

(a) to provide a framework within which an entity assesses how to present fairly the effects of transactions and other events, and assesses whether the result of complying with a requirement in an IFRS would be so misleading that it would not give a fair presentation;

(b) to base the criteria for classifying liabilities as current or non-current solely on the conditions existing at the balance sheet date;

(c) to prohibit the presentation of items of income and expense as 'extraordinary items';

(d) to specify disclosures about the judgements that management has made in the process of applying the entity's accounting policies, apart from those involving estimations, and that have the most significant effect on the amounts recognised in the financial statements; and

(e) to specify disclosures about sources of estimation uncertainty at the balance sheet date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

BC4 The following sections summarise the Board's considerations in reaching its conclusions as part of its Improvements project in 2003:

(a) departures from IFRSs (paragraphs BC23–BC30)

[*] IASC did not publish a Basis for Conclusions.

(b) criterion for exemption from requirements (paragraphs BC34–BC36)

(c) effect of events after the reporting period on the classification of liabilities (paragraphs BC39–BC48)

(d) results of operating activities (paragraphs BC55 and BC56)

(e) minority interest (paragraph BC59)*

(f) extraordinary items (paragraphs BC60–BC64)

(g) disclosure of the judgements management has made in the process of applying the entity's accounting policies (paragraphs BC77 and BC78)

(h) disclosure of major sources of estimation uncertainty (paragraphs BC79–BC84).

Amendment to IAS 1—*Capital Disclosures* (2005)

BC5 In August 2005 the Board issued an Amendment to IAS 1—*Capital Disclosures*. The amendment added to IAS 1 requirements for disclosure of:

(a) the entity's objectives, policies and processes for managing capital.

(b) quantitative data about what the entity regards as capital.

(c) whether the entity has complied with any capital requirements; and if it has not complied, the consequences of such non-compliance.

BC6 The following sections summarise the Board's considerations in reaching its conclusions as part of its amendment to IAS 1 in 2005:

(a) disclosures about capital (paragraphs BC85–BC89)

(b) objectives, policies and processes for managing capital (paragraphs BC90 and BC91)

(c) externally imposed capital requirements (paragraphs BC92–BC97)

(d) internal capital targets (paragraphs BC98–BC100).

Amendments to IAS 32 and IAS 1—*Puttable Financial Instruments and Obligations Arising on Liquidation* (2008)

BC6A In July 2006 the Board published an exposure draft of proposed amendments to IAS 32 and IAS 1 relating to the classification of puttable instruments and instruments with obligations arising only on liquidation. The Board subsequently confirmed the proposals and in February 2008 issued an amendment that now forms part of IAS 1.

Financial statement presentation—Joint project

BC7 In September 2001 the Board added to its agenda the performance reporting project (in March 2006 renamed the 'financial statement presentation project'). The objective of the project was to enhance the usefulness of information presented in the income statement. The Board developed a possible new model for reporting income and expenses and conducted preliminary testing. Similarly, in the United States, the Financial Accounting Standards Board (FASB) added a project on performance reporting to its agenda in October 2001, developed its model and conducted preliminary testing. Constituents raised concerns about both models and about the fact that they were different.

BC8 In April 2004 the Board and the FASB decided to work on financial statement presentation as a joint project. They agreed that the project should address presentation and display not only in the income statement, but also in the other statements that, together with the income statement, would constitute a complete set of financial statements—the balance sheet, the statement of changes in equity, and the cash flow statement. The Board decided to approach the project in two phases. Phase A would address the statements that constitute a complete set of financial statements and the periods for which they are required to be presented. Phase B would be undertaken jointly with the FASB and would address more fundamental issues relating to presentation and display of information in the financial statements, including:

(a) consistent principles for aggregating information in each financial statement.

(b) the totals and subtotals that should be reported in each financial statement.

* In January 2008 the IASB issued an amended IAS 27 *Consolidated and Separate Financial Statements*, which amended 'minority interest' to 'non-controlling interests'.

(c) whether components of other comprehensive income should be reclassified to profit or loss and, if so, the characteristics of the transactions and events that should be reclassified and when reclassification should be made.

(d) whether the direct or the indirect method of presenting operating cash flows provides more useful information.

BC9 In March 2006, as a result of its work in phase A, the Board published an exposure draft of proposed amendments to IAS 1—*A Revised Presentation*. The Board received more than 130 comment letters. The exposure draft proposed amendments that affected the presentation of owner changes in equity and the presentation of comprehensive income, but did not propose to change the recognition, measurement or disclosure of specific transactions and other events required by other IFRSs. It also proposed to bring IAS 1 largely into line with the US standard—SFAS 130 *Reporting Comprehensive Income*. After considering the responses to the exposure draft the Board issued a revised version of IAS 1. The FASB decided to consider phases A and B issues together, and therefore did not publish an exposure draft on phase A.

BC10 The following sections summarise the Board's considerations in reaching its conclusions as part of its revision in 2007:

(a) general purpose financial statements (paragraphs BC11–BC13)

(b) titles of financial statements (paragraphs BC14–BC21)

(c) equal prominence (paragraph BC22)

(d) a statement of financial position as at the beginning of the earliest comparative period (paragraphs BC31 and BC32)

(e) IAS 34 *Interim Financial Reporting* (paragraph BC33)

(f) reporting owner and non-owner changes in equity (paragraphs BC37 and BC38)

(g) reporting comprehensive income (paragraphs BC49–BC54)

(h) subtotal for profit or loss (paragraphs BC57 and BC58)

(i) other comprehensive income-related tax effects (paragraphs BC65–BC68)

(j) reclassification adjustments (paragraphs BC69–BC73)

(k) effects of retrospective application or retrospective restatement (paragraph BC74)

(l) presentation of dividends (paragraph BC75)

(m) IAS 7 *Cash Flow Statements* (paragraph BC76)

(n) presentation of measures per share (paragraphs BC101–BC104)

(o) effective date and transition (paragraph BC105)

(p) differences from SFAS 130 (paragraph BC106).

Definitions

General purpose financial statements (paragraph 7)

BC11 The exposure draft of 2006 proposed a change to the explanatory paragraph of what 'general purpose financial statements' include, in order to produce a more generic definition of a set of financial statements. Paragraph 7 of the exposure draft stated:

> General purpose financial statements include those that are presented separately or within other *public* documents such as a *regulatory filing* or report to shareholders. [emphasis added]

BC12 Respondents expressed concern about the proposed change. They argued that it could be understood as defining as general purpose financial statements any financial statement or set of financial statements filed with a regulator and could capture documents other than annual reports and prospectuses. They saw this change as expanding the scope of IAS 1 to documents that previously would not have contained all of the disclosures required by IAS 1. Respondents pointed out that the change would particularly affect some entities (such as small private companies and subsidiaries of public companies with no external users of financial reports) that are required by law to place their financial statements on a public file.

BC13 The Board acknowledged that in some countries the law requires entities, whether public or private, to report to regulatory authorities and include information in those reports that could be beyond the scope of IAS 1. Because the Board did not intend to extend the definition of general purpose financial statements, it decided to eliminate the explanatory paragraph of what 'general purpose financial statements' include, while retaining the definition of 'general purpose financial statements'.

Financial statements

Complete set of financial statements

Titles of financial statements (paragraph 10)

BC14 The exposure draft of 2006 proposed changes to the titles of some of the financial statements—from 'balance sheet' to 'statement of financial position', from 'income statement' to 'statement of profit or loss' and from 'cash flow statement' to 'statement of cash flows'. In addition, the exposure draft proposed a 'statement of recognised income and expense' and that all owner changes in equity should be included in a 'statement of changes in equity'. The Board did not propose to make any of these changes of nomenclature mandatory.

BC15 Many respondents opposed the proposed changes, pointing out that the existing titles had a long tradition and were well understood. However, the Board reaffirmed its view that the proposed new titles better reflect the function of each financial statement, and pointed out that an entity could choose to use other titles in its financial report.

BC16 The Board reaffirmed its conclusion that the title 'statement of financial position' not only better reflects the function of the statement but is consistent with the *Framework for the Preparation and Presentation of Financial Statements*, which contains several references to 'financial position'. Paragraph 12 of the *Framework* states that the objective of financial statements is to provide information about the financial position, performance and changes in financial position of an entity; paragraph 19 of the *Framework* states that information about financial position is primarily provided in a balance sheet. In the Board's view, the title 'balance sheet' simply reflects that double entry bookkeeping requires debits to equal credits. It does not identify the content or purpose of the statement. The Board also noted that 'financial position' is a well-known and accepted term, as it has been used in auditors' opinions internationally for more than 20 years to describe what the 'balance sheet' presents. The Board decided that aligning the statement's title with its content and the opinion rendered by the auditor would help the users of financial statements.

BC17 As to the other statements, respondents suggested that renaming the balance sheet the 'statement of financial position' implied that the 'cash flow statement' and the 'statement of recognised income and expense' do not also reflect an entity's financial position. The Board observed that although the latter statements reflect changes in an entity's financial position, neither can be called a 'statement of changes in financial position', as this would not depict their true function and objective (ie to present cash flows and performance, respectively). The Board acknowledged that the titles 'income statement' and 'statement of profit or loss' are similar in meaning and could be used interchangeably, and decided to retain the title 'income statement' as this is more commonly used.

BC18 The title of the proposed new statement, the 'statement of recognised income and expense', reflects a broader content than the former 'income statement'. The statement encompasses both income and expenses recognised in profit or loss and income and expenses recognised outside profit or loss.

BC19 Many respondents opposed the title 'statement of recognised income and expense', objecting particularly to the use of the term 'recognised'. The Board acknowledged that the term 'recognised' could also be used to describe the content of other primary statements as 'recognition', explained in paragraph 82 of the *Framework*, is 'the process of incorporating in the balance sheet or income statement an item that meets the definition of an element and satisfies the criteria for recognition set out in paragraph 83.' Many respondents suggested the term 'statement of comprehensive income' instead.

BC20 In response to respondents' concerns and to converge with SFAS 130, the Board decided to rename the new statement a 'statement of comprehensive income'. The term 'comprehensive income' is not defined in the *Framework* but is used in IAS 1 to describe the change in equity of an entity during a period from transactions, events and circumstances other than those resulting from transactions with owners in their capacity as owners. Although the term 'comprehensive income' is used to describe the aggregate of all components of comprehensive income, including profit or loss, the term 'other comprehensive income' refers to income and expenses that under IFRSs are included in comprehensive income but excluded from profit or loss.

BC21 In finalising its revision, the Board confirmed that the titles of financial statements used in this Standard would not be mandatory. The titles will be used in future IFRSs but are not required to be used by entities in their financial statements. Some respondents to the exposure draft expressed concern that non-mandatory titles will result in confusion. However, the Board believes that making use of the titles non-mandatory will allow time for entities to implement changes gradually as the new titles become more familiar.

Equal prominence (paragraphs 11 and 12)

BC22 The Board noted that the financial performance of an entity is not assessed by reference to a single financial statement or a single measure within a financial statement. The Board believes that the financial performance of an entity can be assessed only after all aspects of the financial statements are taken into account and understood in their entirety. Accordingly, the Board decided that in order to help users of the financial statements to understand the financial performance of an entity comprehensively, all financial statements within the complete set of financial statements should be presented with equal prominence.

Departures from IFRSs (paragraphs 19–24)

BC23 IAS 1 (as issued in 1997) permitted an entity to depart from a requirement in a Standard 'in the extremely rare circumstances when management concludes that compliance with a requirement in a Standard would be misleading, and therefore that departure from a requirement is necessary to achieve a fair presentation' (paragraph 17, now paragraph 19). When such a departure occurred, paragraph 18 (now paragraph 20) required extensive disclosure of the facts and circumstances surrounding the departure and the treatment adopted.

BC24 The Board decided to clarify in paragraph 15 of the Standard that for financial statements to present fairly the financial position, financial performance and cash flows of an entity, they must represent faithfully the effects of transactions and other events in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the *Framework*.

BC25 The Board decided to limit the occasions on which an entity should depart from a requirement in an IFRS to the extremely rare circumstances in which management concludes that compliance with the requirement would be so misleading that it would conflict with the objective of financial statements set out in the *Framework*. Guidance on this criterion states that an item of information would conflict with the objective of financial statements when it does not represent faithfully the transactions, other events or conditions that it either purports to represent or could reasonably be expected to represent and, consequently, it would be likely to influence economic decisions made by users of financial statements.

BC26 These amendments provide a framework within which an entity assesses how to present fairly the effects of transactions, other events and conditions, and whether the result of complying with a requirement in an IFRS would be so misleading that it would not give a fair presentation.

BC27 The Board considered whether IAS 1 should be silent on departures from IFRSs. The Board decided against making that change, because it would remove the Board's capability to specify the criteria under which departures from IFRSs should occur.

BC28 Departing from a requirement in an IFRS when considered necessary to achieve a fair presentation would conflict with the regulatory framework in some jurisdictions. The revised IAS 1 takes into account the existence of different regulatory requirements. It requires that when an entity's circumstances satisfy the criterion described in paragraph BC25 for departure from a requirement in an IFRS, the entity should proceed as follows:

(a) When the relevant regulatory framework requires—or otherwise does not prohibit—a departure from the requirement, the entity should make that departure and the disclosures set out in paragraph 20.

(b) When the relevant regulatory framework prohibits departure from the requirement, the entity should, to the maximum extent possible, reduce the perceived misleading aspects of compliance by making the disclosures set out in paragraph 23.

This amendment enables entities to comply with the requirements of IAS 1 when the relevant regulatory framework prohibits departures from accounting standards, while retaining the principle that entities should, to the maximum extent possible, ensure that financial statements provide a fair presentation.

BC29 After considering the comments received on the exposure draft of 2002, the Board added to IAS 1 a requirement in paragraph 21 to disclose the effect of a departure from a requirement of an IFRS in a prior period on the current period's financial statements. Without this disclosure, users of the entity's financial statements could be unaware of the continuing effects of prior period departures.

BC30 In view of the strict criteria for departure from a requirement in an IFRS, IAS 1 includes a rebuttable presumption that if other entities in similar circumstances comply with the requirement, the entity's compliance with the requirement would not be so misleading that it would conflict with the objective of financial statements set out in the *Framework*.

Comparative information

A statement of financial position as at the beginning of the earliest comparative period (paragraph 39)

BC31 The exposure draft of 2006 proposed that a statement of financial position as at the beginning of the earliest comparative period should be presented as part of a complete set of financial statements. This statement would provide a basis for investors and creditors to evaluate information about the entity's performance during the period. However, many respondents expressed concern that the requirement would unnecessarily increase disclosures in financial statements, or would be impracticable, excessive and costly.

BC32 By adding a statement of financial position as at the beginning of the earliest comparative period, the exposure draft proposed that an entity should present three statements of financial position and two of each of the other statements. Considering that financial statements from prior years are readily available for financial analysis, the Board decided to require only two statements of financial position, except when the financial statements have been affected by retrospective application or retrospective restatement, as defined in IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*, or when a reclassification has been made. In those circumstances three statements of financial position are required.

IAS 34 *Interim Financial Reporting*

BC33 The Board decided not to reflect in paragraph 8 of IAS 34 (ie the minimum components of an interim financial report) its decision to require the inclusion of a statement of financial position as at the beginning of the earliest comparative period in a complete set of financial statements. IAS 34 has a year-to-date approach to interim reporting and does not replicate the requirements of IAS 1 in terms of comparative information.

Criterion for exemption from requirements (paragraphs 41–44)

BC34 IAS 1 as issued in 1997 specified that when the presentation or classification of items in the financial statements is amended, comparative amounts should be reclassified unless it is impracticable to do so. Applying a requirement is impracticable when the entity cannot apply it after making every reasonable effort to do so.

BC35 The exposure draft of 2002 proposed a different criterion for exemption from particular requirements. For the reclassification of comparative amounts, and its proposed new requirement to disclose key assumptions and other sources of estimation uncertainty at the end of the reporting period (discussed in paragraphs BC79–BC84), the exposure draft proposed that the criterion for exemption should be that applying the requirements would require undue cost or effort.

BC36 In the light of respondents' comments on the exposure draft, the Board decided that an exemption based on management's assessment of undue cost or effort was too subjective to be applied consistently by different entities. Moreover, balancing costs and benefits was a task for the Board when it sets accounting requirements rather than for entities when they apply them. Therefore, the Board retained the 'impracticability' criterion for exemption. This affects the exemptions now set out in paragraphs 41–43 and 131 of IAS 1. Impracticability is the only basis on which IFRSs allow specific exemptions from applying particular requirements when the effect of applying them is material.[*]

Reporting owner and non-owner changes in equity

BC37 The exposure draft of 2006 proposed to separate changes in equity of an entity during a period arising from transactions with owners in their capacity as owners (ie all owner changes in equity) from other changes in equity (ie non-owner changes in equity). All owner changes in equity would be presented in the statement of changes in equity, separately from non-owner changes in equity.

BC38 Most respondents welcomed this proposal and saw this change as an improvement of financial reporting, by increasing the transparency of those items recognised in equity that are not reported as part of profit or loss. However, some respondents pointed out that the terms 'owner' and 'non-owner' were not defined in the exposure draft, the *Framework* or elsewhere in IFRSs, although they are extensively used in national accounting standards. They also noted that the terms 'owner' and 'equity holder' were used interchangeably in the exposure

[*] In 2006 the IASB issued IFRS 8 *Operating Segments*. As explained in paragraphs BC46 and BC47 of the Basis for Conclusions on IFRS 8, that IFRS includes an exemption from some requirements if the necessary information is not available and the cost to develop it would be excessive.

draft. The Board decided to adopt the term ‘owner’ and use it throughout IAS 1 to converge with SFAS 130, which uses the term in the definition of ‘comprehensive income’.

Statement of financial position

Current assets and current liabilities (paragraphs 68 and 71)

BC38A As part of its improvements project in 2007, the Board identified inconsistent guidance regarding the current/non-current classification of derivatives. Some might read the guidance included in paragraph 71 as implying that financial liabilities classified as held for trading in accordance with IAS 39 *Financial Instruments: Recognition and Measurement* are always required to be presented as current.

BC38B The Board expects the criteria set out in paragraph 69 to be used to assess whether a financial liability should be presented as current or non-current. The ‘held for trading’ category in paragraph 9 of IAS 39 is for measurement purposes and includes financial assets and liabilities that may not be held primarily for trading purposes.

BC38C The Board reaffirmed that if a financial liability is held primarily for trading purposes it should be presented as current regardless of its maturity date. However, a financial liability that is not held for trading purposes, such as a derivative that is not a financial guarantee contract or a designated hedging instrument, should be presented as current or non-current on the basis of its settlement date. For example, derivatives that have a maturity of more than twelve months and are expected to be held for more than twelve months after the reporting period should be presented as non-current assets or liabilities.

BC38D Therefore, the Board decided to remove the identified inconsistency by amending the examples of current liabilities in paragraph 71. The Board also amended paragraph 68 in respect of current assets to remove a similar inconsistency.

Effect of events after the reporting period on the classification of liabilities (paragraphs 69–76)

BC39 Paragraph 63 of IAS 1 (as issued in 1997) included the following:

> An enterprise should continue to classify its long-term interest-bearing liabilities as non-current, even when they are due to be settled within twelve months of the balance sheet date if:
>
> (a) the original term was for a period of more than twelve months;
>
> (b) the enterprise intends to refinance the obligation on a long-term basis; and
>
> (c) that intention is supported by an agreement to refinance, or to reschedule payments, which is completed before the financial statements are authorised for issue.

BC40 Paragraph 65 stated:

> Some borrowing agreements incorporate undertakings by the borrower (covenants) which have the effect that the liability becomes payable on demand if certain conditions related to the borrower’s financial position are breached. In these circumstances, the liability is classified as non-current only when:
>
> (a) the lender has agreed, prior to the authorisation of the financial statements for issue, not to demand payment as a consequence of the breach; and
>
> (b) it is not probable that further breaches will occur within twelve months of the balance sheet date.

BC41 The Board considered these requirements and concluded that refinancing, or the receipt of a waiver of the lender’s right to demand payment, that occurs after the reporting period should not be taken into account in the classification of a liability.

BC42 Therefore, the exposure draft of 2002 proposed:

(a) to amend paragraph 63 to specify that a long-term financial liability due to be settled within twelve months of the balance sheet date should not be classified as a non-current liability because an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the balance sheet date and before the financial statements are authorised for issue. This amendment would not affect the classification of a liability as non-current when the entity has, under the terms of an existing loan facility, the discretion to refinance or roll over its obligations for at least twelve months after the balance sheet date.

(b) to amend paragraph 65 to specify that a long-term financial liability that is payable on demand because the entity breached a condition of its loan agreement should be classified as current at the balance sheet date even if the lender has agreed after the balance sheet date, and before the financial statements are authorised for issue, not to demand payment as a consequence of the breach. However, if the lender has agreed by the balance sheet date to provide a period of grace within which the entity can rectify the breach and during which the lender cannot demand immediate repayment, the liability is classified as non-current if it is due for settlement, without that breach of the loan agreement, at least twelve months after the balance sheet date and:

(i) the entity rectifies the breach within the period of grace; or

(ii) when the financial statements are authorised for issue, the period of grace is incomplete and it is probable that the breach will be rectified.

BC43 Some respondents disagreed with these proposals. They advocated classifying a liability as current or non-current according to whether it is expected to use current assets of the entity, rather than strictly on the basis of its date of maturity and whether it is callable at the end of the reporting period. In their view, this would provide more relevant information about the liability's future effect on the timing of the entity's resource flows.

BC44 However, the Board decided that the following arguments for changing paragraphs 63 and 65 were more persuasive:

(a) refinancing a liability after the balance sheet date does not affect the entity's liquidity and solvency *at the balance sheet date*, the reporting of which should reflect contractual arrangements in force on that date. Therefore, it is a non-adjusting event in accordance with IAS 10 *Events after the Balance Sheet Date* and should not affect the presentation of the entity's balance sheet.

(b) it is illogical to adopt a criterion that 'non-current' classification of short-term obligations expected to be rolled over for at least twelve months after the balance sheet date depends on whether the roll-over is at the discretion of the entity, and then to provide an exception based on refinancing occurring after the balance sheet date.

(c) in the circumstances set out in paragraph 65, unless the lender has waived its right to demand immediate repayment or granted a period of grace within which the entity may rectify the breach of the loan agreement, the financial condition of the entity at the balance sheet date was that the entity did not hold an absolute right to defer repayment, based on the terms of the loan agreement. The granting of a waiver or a period of grace changes the terms of the loan agreement. Therefore, an entity's receipt from the lender, after the balance sheet date, of a waiver or a period of grace of at least twelve months does not change the nature of the liability to non-current until it occurs.

BC45 IAS 1 now includes the amendments proposed in 2002, with one change. The change relates to the classification of a long-term loan when, at the end of the reporting period, the lender has provided a period of grace within which a breach of the loan agreement can be rectified, and during which period the lender cannot demand immediate repayment of the loan.

BC46 The exposure draft proposed that such a loan should be classified as non-current if it is due for settlement, without the breach, at least twelve months after the balance sheet date and:

(a) the entity rectifies the breach within the period of grace; or

(b) when the financial statements are authorised for issue, the period of grace is incomplete and it is probable that the breach will be rectified.

BC47 After considering respondents' comments, the Board decided that the occurrence or probability of a rectification of a breach after the reporting period is irrelevant to the conditions existing at the end of the reporting period. The revised IAS 1 requires that, for the loan to be classified as non-current, the period of grace must end at least twelve months after the reporting period (see paragraph 75). Therefore, the conditions (a) and (b) in paragraph BC46 are redundant.

BC48 The Board considered arguments that if a period of grace to remedy a breach of a long-term loan agreement is provided before the end of the reporting period, the loan should be classified as non-current regardless of the length of the period of grace. These arguments are based on the view that, at the end of the reporting period, the lender does not have an unconditional legal right to demand repayment before the original maturity date (ie if the entity remedies the breach during the period of grace, it is entitled to repay the loan on the original maturity date). However, the Board concluded that an entity should classify a loan as non-current only if it has an unconditional right to defer settlement of the loan for at least twelve months after the reporting period. This criterion focuses on the legal rights of the entity, rather than those of the lender.

Statement of comprehensive income

Reporting comprehensive income (paragraph 81)

BC49 The exposure draft of 2006 proposed that all non-owner changes in equity should be presented in a single statement or in two statements. In a single-statement presentation, all items of income and expense are presented together. In a two-statement presentation, the first statement ('income statement') presents income and expenses recognised in profit or loss and the second statement ('statement of comprehensive income') begins with profit or loss and presents, in addition, items of income and expense that IFRSs require or permit to be recognised outside profit or loss. Such items include, for example, translation differences related to foreign operations and gains or losses on available-for-sale financial assets. The statement of comprehensive income does not include transactions with owners in their capacity as owners. Such transactions are presented in the statement of changes in equity.

BC50 Respondents to the exposure draft had mixed views about whether the Board should permit a choice of displaying non-owner changes in equity in one statement or two statements. Many respondents agreed with the Board's proposal to maintain the two-statement approach and the single-statement approach as alternatives and a few urged the Board to mandate one of them. However, most respondents preferred the two-statement approach because it distinguishes profit or loss and total comprehensive income; they believe that with the two-statement approach, the 'income statement' remains a primary financial statement. Respondents supported the presentation of two separate statements as a transition measure until the Board develops principles to determine the criteria for inclusion of items in profit or loss or in other comprehensive income.

BC51 The exposure draft of 2006 expressed the Board's preference for a single statement of all non-owner changes in equity. The Board provided several reasons for this preference. All items of non-owner changes in equity meet the definitions of income and expenses in the *Framework*. The *Framework* does not define profit or loss, nor does it provide criteria for distinguishing the characteristics of items that should be included in profit or loss from those items that should be excluded from profit or loss. Therefore, the Board decided that it was conceptually correct for an entity to present all non-owner changes in equity (ie all income and expenses recognised in a period) in a single statement because there are no clear principles or common characteristics that can be used to separate income and expenses into two statements.

BC52 However, in the Board's discussions with interested parties, it was clear that many were strongly opposed to the concept of a single statement. They argued that there would be undue focus on the bottom line of the single statement. In addition, many argued that it was premature for the Board to conclude that presentation of income and expense in a single statement was an improvement in financial reporting without also addressing the other aspects of presentation and display, namely deciding what categories and line items should be presented in a statement of recognised income and expense.

BC53 In the light of these views, although it preferred a single statement, the Board decided that an entity should have the choice of presenting all income and expenses recognised in a period in one statement or in two statements. An entity is prohibited from presenting components of income and expense (ie non-owner changes in equity) in the statement of changes in equity.

BC54 Many respondents disagreed with the Board's preference and thought that a decision at this stage would be premature. In their view the decision about a single-statement or two-statement approach should be subject to further consideration. They urged the Board to address other aspects of presentation and display, namely deciding which categories and line items should be presented in a 'statement of comprehensive income'. The Board reaffirmed its reasons for preferring a single-statement approach and agreed to address other aspects of display and presentation in the next stage of the project.

Results of operating activities

BC55 IAS 1 omits the requirement in the 1997 version to disclose the results of operating activities as a line item in the income statement. 'Operating activities' are not defined in IAS 1, and the Board decided not to require disclosure of an undefined item.

BC56 The Board recognises that an entity may elect to disclose the results of operating activities, or a similar line item, even though this term is not defined. In such cases, the Board notes that the entity should ensure that the amount disclosed is representative of activities that would normally be regarded as 'operating'. In the Board's view, it would be misleading and would impair the comparability of financial statements if items of an operating nature were excluded from the results of operating activities, even if that had been industry practice. For example, it would be inappropriate to exclude items clearly related to operations (such as inventory write-downs and restructuring and relocation expenses) because they occur irregularly or infrequently or are unusual in amount. Similarly, it would be inappropriate to exclude items on the grounds that they do not involve cash flows, such as depreciation and amortisation expenses.

Subtotal for profit or loss (paragraph 82)

BC57 As revised, IAS 1 requires a subtotal for profit or loss in the statement of comprehensive income. If an entity chooses to present comprehensive income by using two statements, it should begin the second statement with profit or loss—the bottom line of the first statement (the 'income statement')—and display the components of other comprehensive income immediately after that. The Board concluded that this is the best way to achieve the objective of equal prominence (see paragraph BC22) for the presentation of income and expenses. An entity that chooses to display comprehensive income in one statement should include profit or loss as a subtotal within that statement.

BC58 The Board acknowledged that the items included in profit or loss do not possess any unique characteristics that allow them to be distinguished from items that are included in other comprehensive income. However, the Board and its predecessor have required some items to be recognised outside profit or loss. The Board will deliberate in the next stage of the project how items of income and expense should be presented in the statement of comprehensive income.

Minority interest (paragraph 83)*

BC59 IAS 1 requires the 'profit or loss attributable to minority interest' and 'profit or loss attributable to owners of the parent' each to be presented in the income statement in accordance with paragraph 83. These amounts are to be presented as allocations of profit or loss, not as items of income or expense. A similar requirement has been added for the statement of changes in equity, in paragraph 106(a). These changes are consistent with IAS 27 *Consolidated and Separate Financial Statements*, which requires that in a consolidated balance sheet (now called 'statement of financial position'), minority interest is presented within equity because it does not meet the definition of a liability in the *Framework*.

Extraordinary items (paragraph 87)

BC60 IAS 8 *Net Profit or Loss for the Period, Fundamental Errors and Changes in Accounting Policies* (issued in 1993) required extraordinary items to be disclosed in the income statement separately from the profit or loss from ordinary activities. That standard defined 'extraordinary items' as 'income or expenses that arise from events or transactions that are clearly distinct from the ordinary activities of the enterprise and therefore are not expected to recur frequently or regularly'.

BC61 In 2002, the Board decided to eliminate the concept of extraordinary items from IAS 8 and to prohibit the presentation of items of income and expense as 'extraordinary items' in the income statement and the notes. Therefore, in accordance with IAS 1, no items of income and expense are to be presented as arising from outside the entity's ordinary activities.

BC62 Some respondents to the exposure draft of 2002 argued that extraordinary items should be presented in a separate component of the income statement because they are clearly distinct from all of the other items of income and expense, and because such presentation highlights to users of financial statements the items of income and expense to which the least attention should be given when predicting an entity's future performance.

BC63 The Board decided that items treated as extraordinary result from the normal business risks faced by an entity and do not warrant presentation in a separate component of the income statement. The nature or function of a transaction or other event, rather than its frequency, should determine its presentation within the income statement. Items currently classified as 'extraordinary' are only a subset of the items of income and expense that may warrant disclosure to assist users in predicting an entity's future performance.

BC64 Eliminating the category of extraordinary items eliminates the need for arbitrary segregation of the effects of related external events—some recurring and others not—on the profit or loss of an entity for a period. For example, arbitrary allocations would have been necessary to estimate the financial effect of an earthquake on an

* In January 2008 the IASB issued an amended IAS 27 *Consolidated and Separate Financial Statements*, which amended 'minority interest' to 'non-controlling interests'.

entity's profit or loss if it occurs during a major cyclical downturn in economic activity. In addition, paragraph 97 of IAS 1 requires disclosure of the nature and amount of material items of income and expense.

Other comprehensive income—related tax effects (paragraphs 90 and 91)

BC65 The exposure draft of 2006 proposed to allow components of 'other recognised income and expense' (now 'other comprehensive income') to be presented before tax effects ('gross presentation') or after their related tax effects ('net presentation'). The 'gross presentation' facilitated the traceability of other comprehensive income items to profit or loss, because items of profit or loss are generally displayed before tax. The 'net presentation' facilitated the identification of other comprehensive income items in the equity section of the statement of financial position. A majority of respondents supported allowing both approaches. The Board reaffirmed its conclusion that components of other comprehensive income could be displayed either (a) net of related tax effects or (b) before related tax effects.

BC66 Regardless of whether a pre-tax or post-tax display was used, the exposure draft proposed to require disclosure of the amount of income tax expense or benefit allocated separately to individual components of other comprehensive income, in line with SFAS 130. Many respondents agreed in principle with this disclosure, because they agreed that it helped to improve the clarity and transparency of such information, particularly when components of other comprehensive income are taxed at rates different from those applied to profit or loss.

BC67 However, most respondents expressed concern about having to trace the tax effect for each one of the components of other comprehensive income. Several observed that the tax allocation process is arbitrary (eg it may involve the application of subjectively determined tax rates) and some pointed out that this information is not readily available for some industries (eg the insurance sector), where components of other comprehensive income are multiple and tax allocation involves a high degree of subjectivity. Others commented that they did not understand why tax should be attributed to components of comprehensive income line by line, when this is not a requirement for items in profit or loss.

BC68 The Board decided to maintain the disclosure of income tax expense or benefit allocated to each component of other comprehensive income. Users of financial statements often requested further information on tax amounts relating to components of other comprehensive income, because tax rates often differed from those applied to profit or loss. The Board also observed that an entity should have such tax information available and that a disclosure requirement would therefore not involve additional cost for preparers of financial statements.

Reclassification adjustments (paragraphs 92–96)

BC69 In the exposure draft of 2006, the Board proposed that an entity should separately present reclassification adjustments. These adjustments are the amounts reclassified to profit or loss in the current period that were previously recognised in other comprehensive income. The Board decided that adjustments necessary to avoid double-counting items in total comprehensive income when those items are reclassified to profit or loss in accordance with IFRSs. The Board's view was that separate presentation of reclassification adjustments is essential to inform users of those amounts that are included as income and expenses in different periods—as income or expenses in other comprehensive income in previous periods and as income or expenses in profit or loss in the current period. Without such information, users may find it difficult to assess the effect of reclassifications on profit or loss and to calculate the overall gain or loss associated with available-for-sale financial assets, cash flow hedges and on translation or disposal of foreign operations.

BC70 Most respondents agreed with the Board's decision and believe that the disclosure of reclassification adjustments is important to understanding how components recognised in profit or loss are related to other items recognised in equity in two different periods. However, some respondents suggested that the Board should use the term 'recycling', rather than 'reclassification' as the former term is more common. The Board concluded that both terms are similar in meaning, but decided to use the term 'reclassification adjustment' to converge with the terminology used in SFAS 130.

BC71 The exposure draft proposed to allow the presentation of reclassification adjustments in the statement of recognised income and expense (now 'statement of comprehensive income') or in the notes. Most respondents supported this approach.

BC72 Some respondents noted some inconsistencies in the definition of 'reclassification adjustments' in the exposure draft (now paragraphs 7 and 93 of IAS 1). Respondents suggested that the Board should expand the definition in paragraph 7 to include gains and losses recognised in current periods in addition to those recognised in earlier periods, to make the definition consistent with paragraph 93. They commented that, without clarification, there could be differences between interim and annual reporting, for reclassifications of items that arise in one interim period and reverse out in a different interim period within the same annual period.

BC73 The Board decided to align the definition of reclassification adjustments with SFAS 130 and include an additional reference to ‘current periods’ in paragraph 7.

Statement of changes in equity

Effects of retrospective application or retrospective restatement (paragraph 106(b))

BC74 Some respondents to the exposure draft of 2006 asked the Board to clarify whether the effects of retrospective application or retrospective restatement, as defined in IAS 8, should be regarded as non-owner changes in equity. The Board noted that IAS 1 specifies that these effects are included in the statement of changes in equity. However, the Board decided to clarify that the effects of retrospective application or retrospective restatement are not changes in equity in the period, but provide a reconciliation between the previous period’s closing balance and the opening balance in the statement of changes in equity.

Presentation of dividends (paragraph 107)

BC75 The Board reaffirmed its conclusion to require the presentation of dividends in the statement of changes in equity or in the notes, because dividends are distributions to owners in their capacity as owners and the statement of changes in equity presents all owner changes in equity. The Board concluded that an entity should not present dividends in the statement of comprehensive income because that statement presents non-owner changes in equity.

Statement of cash flows

IAS 7 *Cash Flow Statements* (paragraph 111)

BC76 The Board considered whether the operating section of an indirect method statement of cash flows should begin with total comprehensive income instead of profit or loss as is required by IAS 7 *Cash Flow Statements*. When components of other comprehensive income are non-cash items, they would become reconciling items in arriving at cash flows from operating activities and would add items to the statement of cash flows without adding information content. The Board concluded that an amendment to IAS 7 is not required; however, as mentioned in paragraph BC14 the Board decided to relabel this financial statement as ‘statement of cash flows’.

Notes

Disclosure of the judgements that management has made in the process of applying the entity’s accounting policies (paragraphs 122–124)

BC77 The revised IAS 1 requires disclosure of the judgements, apart from those involving estimations, that management has made in the process of applying the entity’s accounting policies and that have the most significant effect on the amounts recognised in the financial statements (see paragraph 122). An example of these judgements is how management determines whether financial assets are held-to-maturity investments. The Board decided that disclosure of the most important of these judgements would enable users of financial statements to understand better how the accounting policies are applied and to make comparisons between entities regarding the basis on which managements make these judgements.

BC78 Comments received on the exposure draft of 2002 indicated that the purpose of the proposed disclosure was unclear. Accordingly, the Board amended the disclosure explicitly to exclude judgements involving estimations (which are the subject of the disclosure in paragraph 125) and added another four examples of the types of judgements disclosed (see paragraphs 123 and 124).

Disclosure of major sources of estimation uncertainty (paragraphs 125–133)

BC79 IAS 1 requires disclosure of the assumptions concerning the future, and other major sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. For those assets and liabilities, the proposed disclosures include details of:

(a) their nature; and

(b) their carrying amount as at the end of the reporting period (see paragraph 125).

BC80 Determining the carrying amounts of some assets and liabilities requires estimation of the effects of uncertain future events on those assets and liabilities at the end of the reporting period. For example, in the absence of recently observed market prices used to measure the following assets and liabilities, future-oriented estimates are necessary to measure the recoverable amount of classes of property, plant and equipment, the effect of technological obsolescence of inventories, provisions subject to the future outcome of litigation in progress, and long-term employee benefit liabilities such as pension obligations. These estimates involve assumptions about items such as the risk adjustment to cash flows or discount rates used, future changes in salaries and future changes in prices affecting other costs. No matter how diligently an entity estimates the carrying amounts of assets and liabilities subject to significant estimation uncertainty at the end of the reporting period, the reporting of point estimates in the statement of financial position cannot provide information about the estimation uncertainties involved in measuring those assets and liabilities and the implications of those uncertainties for the period's profit or loss.

BC81 The *Framework* states that 'The economic decisions that are made by users of financial statements require an evaluation of the ability of an entity to generate cash and cash equivalents and of the timing and certainty of their generation.' The Board decided that disclosure of information about assumptions and other major sources of estimation uncertainty at the end of the reporting period enhances the relevance, reliability and understandability of the information reported in financial statements. These assumptions and other sources of estimation uncertainty relate to estimates that require management's most difficult, subjective or complex judgements. Therefore, disclosure in accordance with paragraph 125 of the revised IAS 1 would be made in respect of relatively few assets or liabilities (or classes of them).

BC82 The exposure draft of 2002 proposed the disclosure of some 'sources of measurement uncertainty'. In the light of comments received that the purpose of this disclosure was unclear, the Board decided:

(a) to amend the subject of that disclosure to 'sources of estimation uncertainty at the end of the reporting period'; and

(b) to clarify in the revised Standard that the disclosure does not apply to assets and liabilities measured at fair value based on recently observed market prices (see paragraph 128 of IAS 1).

BC83 When assets and liabilities are measured at fair value on the basis of recently observed market prices, future changes in carrying amounts would not result from using estimates to measure the assets and liabilities at the end of the reporting period. Using observed market prices to measure assets or liabilities obviates the need for estimates at the end of the reporting period. The market prices properly reflect the fair values at the end of the reporting period, even though future market prices could be different. The objective of fair value measurement is to reflect fair value at the measurement date, not to predict a future value.

BC84 IAS 1 does not prescribe the particular form or detail of the disclosures. Circumstances differ from entity to entity, and the nature of estimation uncertainty at the end of the reporting period has many facets. IAS 1 limits the scope of the disclosures to items that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The longer the future period to which the disclosures relate, the greater the range of items that would qualify for disclosure, and the less specific are the disclosures that could be made about particular assets or liabilities. A period longer than the next financial year might obscure the most relevant information with other disclosures.

Disclosures about capital (paragraphs 134 and 135)

BC85 In July 2004 the Board published an exposure draft—ED 7 *Financial Instruments: Disclosures*. As part of that project, the Board considered whether it should require disclosures about capital.

BC86 The level of an entity's capital and how it manages capital are important factors for users to consider in assessing the risk profile of an entity and its ability to withstand unexpected adverse events. The level of capital might also affect the entity's ability to pay dividends. Consequently, ED 7 proposed disclosures about capital.

BC87 In ED 7 the Board decided that it should not limit the requirements for disclosures about capital to entities that are subject to external capital requirements (eg regulatory capital requirements established by legislation or other regulation). The Board believes that information about capital is useful for all entities, as is evidenced by the fact that some entities set internal capital requirements and norms have been established for some industries. The Board noted that the capital disclosures are not intended to replace disclosures required by regulators. The Board also noted that the financial statements should not be regarded as a substitute for disclosures to regulators (which may not be available to all users) because the function of disclosures made to regulators may differ from the function of those to other users. Therefore, the Board decided that information about capital should be required of all entities because it is useful to users of general purpose financial statements. Accordingly, the Board did not distinguish between the requirements for regulated and non-regulated entities.

BC88 Some respondents to ED 7 questioned the relevance of the capital disclosures in an IFRS dealing with disclosures relating to financial instruments. The Board noted that an entity's capital does not relate solely to financial instruments and, thus, capital disclosures have more general relevance. Accordingly, the Board included these disclosures in IAS 1, rather than IFRS 7 *Financial Instruments: Disclosures*, the IFRS resulting from ED 7.

BC89 The Board also decided that an entity's decision to adopt the amendments to IAS 1 should be independent of the entity's decision to adopt IFRS 7. The Board noted that issuing a separate amendment facilitates separate adoption decisions.

Objectives, policies and processes for managing capital (paragraph 136)

BC90 The Board decided that disclosure about capital should be placed in the context of a discussion of the entity's objectives, policies and processes for managing capital. This is because the Board believes that such a discussion both communicates important information about the entity's capital strategy and provides the context for other disclosures.

BC91 The Board considered whether an entity can have a view of capital that differs from what IFRSs define as equity. The Board noted that, although for the purposes of this disclosure capital would often equate with equity as defined in IFRSs, it might also include or exclude some components. The Board also noted that this disclosure is intended to give entities the opportunity to describe how they view the components of capital they manage, if this is different from what IFRSs define as equity.

Externally imposed capital requirements (paragraph 136)

BC92 The Board considered whether it should require disclosure of any externally imposed capital requirements. Such a capital requirement could be:

(a) an industry-wide requirement with which all entities in the industry must comply; or

(b) an entity-specific requirement imposed on a particular entity by its prudential supervisor or other regulator.

BC93 The Board noted that some industries and countries have industry-wide capital requirements, and others do not. Thus, the Board concluded that it should not require disclosure of industry-wide requirements, or compliance with such requirements, because such disclosure would not lead to comparability between different entities or between similar entities in different countries.

BC94 The Board concluded that disclosure of the existence and level of entity-specific capital requirements is important information for users, because it informs them about the risk assessment of the regulator. Such disclosure improves transparency and market discipline.

BC95 However, the Board noted the following arguments against requiring disclosure of externally imposed entity-specific capital requirements.

(a) Users of financial statements might rely primarily on the regulator's assessment of solvency risk without making their own risk assessment.

(b) The focus of a regulator's risk assessment is for those whose interests the regulations are intended to protect (eg depositors or policyholders). This emphasis is different from that of a shareholder. Thus, it could be misleading to suggest that the regulator's risk assessment could, or should, be a substitute for independent analysis by investors.

(c) The disclosure of entity-specific capital requirements imposed by a regulator might undermine that regulator's ability to impose such requirements. For example, the information could cause depositors to withdraw funds, a prospect that might discourage regulators from imposing requirements.

Furthermore, an entity's regulatory dialogue would become public, which might not be appropriate in all circumstances.

(d) Because different regulators have different tools available, for example formal requirements and moral suasion, a requirement to disclose entity-specific capital requirements could not be framed in a way that would lead to the provision of information that is comparable across entities.

(e) Disclosure of capital requirements (and hence, regulatory judgements) could hamper clear communication to the entity of the regulator's assessment by creating incentives to use moral suasion and other informal mechanisms.

(f) Disclosure requirements should not focus on entity-specific capital requirements in isolation, but should focus on how entity-specific capital requirements affect how an entity manages and determines the adequacy of its capital resources.

(g) A requirement to disclose entity-specific capital requirements imposed by a regulator is not part of Pillar 3 of the Basel II Framework developed by the Basel Committee on Banking Supervision.

BC96 Taking into account all of the above arguments, the Board decided not to require quantitative disclosure of externally imposed capital requirements. Rather, it decided to require disclosures about whether the entity complied with any externally imposed capital requirements during the period and, if not, the consequences of non-compliance. This retains confidentiality between regulators and the entity, but alerts users to breaches of capital requirements and their consequences.

BC97 Some respondents to ED 7 did not agree that breaches of externally imposed capital requirements should be disclosed. They argued that disclosure about breaches of externally imposed capital requirements and the associated regulatory measures subsequently imposed could be disproportionately damaging to entities. The Board was not persuaded by these arguments because it believes that such concerns indicate that information about breaches of externally imposed capital requirements may often be material by its nature. The *Framework* states that 'Information is material if its omission or misstatement could influence the economic decisions of users taken on the basis of the financial statements.' Similarly, the Board decided not to provide an exemption for temporary non-compliance with regulatory requirements during the year. Information that an entity is sufficiently close to its limits to breach them, even on a temporary basis, is useful for users.

Internal capital targets

BC98 The Board proposed in ED 7 that the requirement to disclose information about breaches of capital requirements should apply equally to breaches of internally imposed requirements, because it believed the information is also useful to a user of the financial statements.

BC99 However, this proposal was criticised by respondents to ED 7 for the following reasons:

(a) The information is subjective and, thus, not comparable between entities. In particular, different entities will set internal targets for different reasons, so a breach of a requirement might signify different things for different entities. In contrast, a breach of an external requirement has similar implications for all entities required to comply with similar requirements.

(b) Capital targets are not more important than other internally set financial targets, and to require disclosure only of capital targets would provide users with incomplete, and perhaps misleading, information.

(c) Internal targets are estimates that are subject to change by the entity. It is not appropriate to require the entity's performance against this benchmark to be disclosed.

(d) An internally set capital target can be manipulated by management. The disclosure requirement could cause management to set the target so that it would always be achieved, providing little useful information to users and potentially reducing the effectiveness of the entity's capital management.

BC100 As a result, the Board decided not to require disclosure of the capital targets set by management, whether the entity has complied with those targets, or the consequences of any non-compliance. However, the Board confirmed its view that when an entity has policies and processes for managing capital, qualitative disclosures about these policies and processes are useful. The Board also concluded that these disclosures, together with disclosure of the components of equity and their changes during the year (required by paragraphs 106–110), would give sufficient information about entities that are not regulated or subject to externally imposed capital requirements.

Puttable financial instruments and obligations arising on liquidation

BC100A The Board decided to require disclosure of information about puttable instruments and instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation that are reclassified in accordance with paragraphs 16E and 16F of IAS 32. This is because the Board concluded that this disclosure allows users of financial statements to understand the effects of any reclassifications.

BC100B The Board also concluded that entities with puttable financial instruments classified as equity should be required to disclose additional information to allow users to assess any effect on the entity's liquidity arising from the ability of the holder to put the instruments to the issuer. Financial instruments classified as equity usually do not include any obligation for the entity to deliver a financial asset to another party. Therefore, the Board concluded that additional disclosures are needed in these circumstances. In particular, the Board concluded that entities should disclose the expected cash outflow on redemption or repurchase of those financial instruments that are classified as equity and information about how that amount was determined. That information allows liquidity risk associated with the put obligation and future cash flows to be evaluated.

Presentation of measures per share

BC101 The exposure draft of 2006 did not propose to change the requirements of IAS 33 *Earnings per Share* on the presentation of basic and diluted earnings per share. A majority of respondents agreed with this decision. In their opinion, earnings per share should be the only measure per share permitted or required in the statement of comprehensive income and changing those requirements was beyond the scope of this stage of the financial statement presentation project.

BC102 However, some respondents would like to see alternative measures per share whenever earnings per share is not viewed as the most relevant measure for financial analysts (ie credit rating agencies that focus on other measures). A few respondents proposed that an entity should also display an amount per share for total comprehensive income, because this was considered a useful measure. The Board did not support including alternative measures per share in the financial statements, until totals and subtotals, and principles for aggregating and disaggregating items, are addressed and discussed as part of the next stage of the financial statement presentation project.

BC103 Some respondents also interpreted the current provisions in IAS 33 as allowing de facto a display of alternative measures in the income statement. In its deliberations, the Board was clear that paragraph 73 of IAS 33 did not leave room for confusion. However, it decided that the wording in paragraph 73 could be improved to clarify that alternative measures should be shown 'only in the notes'. This will be done when IAS 33 is revisited or as part of the annual improvements process.

BC104 One respondent commented that the use of the word 'earnings' was inappropriate in the light of changes proposed in the exposure draft and that the measure should be denominated 'profit or loss per share', instead. The Board considered that this particular change in terminology was beyond the scope of IAS 1.

Transition and effective date

BC105 The Board is committed to maintaining a 'stable platform' of substantially unchanged standards for annual periods beginning between 1 January 2006 and 31 December 2008. In addition, some preparers will need time to make the system changes necessary to comply with the revisions to IAS 1. Therefore, the Board decided that the effective date of IAS 1 should be annual periods beginning on or after 1 January 2009, with earlier application permitted.

Differences from SFAS 130

BC106 In developing IAS 1, the Board identified the following differences from SFAS 130:

(a) **Reporting and display of comprehensive income** Paragraph 22 of SFAS 130 permits a choice of displaying comprehensive income and its components, in one or two statements of financial performance or in a statement of changes in equity. IAS 1 (as revised in 2007) does not permit display in a statement of changes in equity.

(b) **Reporting other comprehensive income in the equity section of a statement of financial position** Paragraph 26 of SFAS 130 specifically states that the *total of other comprehensive income* is reported separately from retained earnings and additional paid-in capital in a statement of financial position at the end of the period. A descriptive title such as *accumulated other comprehensive income* is used for that component of equity. An entity discloses accumulated balances for each classification in that separate component of equity in a statement of financial position, in a statement of changes in equity, or in notes to the financial statements. IAS 1 (as revised in 2007) does not specifically require the display of a total of accumulated other comprehensive income in the statement of financial position.

(c) **Display of the share of other comprehensive income items of associates and joint ventures accounted for using the equity method** Paragraph 82 of IAS 1 (as revised in 2007) requires the display in the statement of comprehensive income of the investor's share of the investee's other comprehensive income. Paragraph 122 of SFAS 130 does not specify how that information should be displayed. An investor is permitted to combine its proportionate share of other comprehensive income amounts with its own other comprehensive income items and display the aggregate of those amounts in an income statement type format or in a statement of changes in equity.

Appendix
Amendments to the Basis for Conclusions on other IFRSs

This appendix contains amendments to the Basis for Conclusions on other IFRSs that are necessary in order to ensure consistency with the revised IAS 1. Amended paragraphs are shown with the new text underlined and deleted text struck through.

* * * * *

The amendments contained in this appendix when this Standard was revised in 2007 have been incorporated into the relevant pronouncements published in this volume.

Dissenting opinions on IAS 1

Dissent of Mary E Barth, Anthony T Cope, Robert P Garnett and James J Leisenring from IAS 1 (as revised in September 2007)

DO1 Professor Barth and Messrs Cope, Garnett and Leisenring voted against the issue of IAS 1 *Presentation of Financial Statements* in 2007. The reasons for their dissent are set out below.

DO2 Those Board members agree with the requirement to report all items of income and expense separately from changes in net assets that arise from transactions with owners in their capacity as owners. Making that distinction clearly is a significant improvement in financial reporting.

DO3 However, they believe that the decision to permit entities to divide the statement of comprehensive income into two separate statements is both conceptually unsound and unwise.

DO4 As noted in paragraph BC51, the *Framework* does not define profit or loss, or net income. It also does not indicate what criteria should be used to distinguish between those items of recognised income and expense that should be included in profit or loss and those items that should not. In some cases, it is even possible for identical transactions to be reported inside or outside profit or loss. Indeed, in that same paragraph, the Board acknowledges these facts, and indicates that it had a preference for reporting all items of income and expense in a single statement, believing that a single statement is the conceptually correct approach. Those Board members believe that some items of income and expense that will potentially bypass the statement of profit and loss can be as significant to the assessment of an entity's performance as items that will be included. Until a conceptual distinction can be developed to determine whether any items should be reported in profit or loss or elsewhere, financial statements will lack neutrality and comparability unless all items are reported in a single statement. In such a statement, profit or loss can be shown as a subtotal, reflecting current conventions.

DO5 In the light of those considerations, it is puzzling that most respondents to the exposure draft that proposed these amendments favoured permitting a two-statement approach, reasoning that it 'distinguishes between profit and loss and total comprehensive income' (paragraph BC50). Distinguishing between those items reported in profit or loss and those reported elsewhere is accomplished by the requirement for relevant subtotals to be included in a statement of comprehensive income. Respondents also stated that a two-statement approach gives primacy to the 'income statement'; that conflicts with the Board's requirement in paragraph 11 of IAS 1 to give equal prominence to all financial statements within a set of financial statements.

DO6 Those Board members also believe that the amendments are flawed by offering entities a choice of presentation methods. The Board has expressed a desire to reduce alternatives in IFRSs. The *Preface to International Financial Reporting Standards*, in paragraph 13, states: 'the IASB intends not to permit choices in accounting treatment … and will continue to reconsider … those transactions and events for which IASs permit a choice of accounting treatment, with the objective of reducing the number of those choices.' The *Preface* extends this objective to both accounting and reporting. The same paragraph states: 'The IASB's objective is to require like transactions and events to be accounted for *and reported* in a like way and unlike transactions and events to be accounted for *and reported* differently' (emphasis added). By permitting a choice in this instance, the IASB has abandoned that principle.

DO7 Finally, the four Board members believe that allowing a choice of presentation at this time will ingrain practice, and make achievement of the conceptually correct presentation more difficult as the long-term project on financial statement presentation proceeds.

Guidance on implementing IAS 1 *Presentation of Financial Statements*

This guidance accompanies, but is not part of, IAS 1.

Illustrative financial statement structure

IG1 IAS 1 sets out the components of financial statements and minimum requirements for disclosure in the statements of financial position, comprehensive income and changes in equity. It also describes further items that may be presented either in the relevant financial statement or in the notes. This guidance provides simple examples of ways in which the requirements of IAS 1 for the presentation of the statements of financial position, comprehensive income and changes in equity might be met. An entity should change the order of presentation, the titles of the statements and the descriptions used for line items when necessary to suit its particular circumstances.

IG2 The guidance is in three sections. Paragraphs IG3–IG6 provide examples of the presentation of financial statements. Paragraphs IG7–IG9 provide an example of the determination of reclassification adjustments for available-for-sale financial assets in accordance with IAS 39 *Financial Instruments: Recognition and Measurement*. Paragraphs IG10 and IG11 provide examples of capital disclosures.

IG3 The illustrative statement of financial position shows one way in which an entity may present a statement of financial position distinguishing between current and non-current items. Other formats may be equally appropriate, provided the distinction is clear.

IG4 The illustrations use the term ‘comprehensive income’ to label the total of all components of comprehensive income, including profit or loss. The illustrations use the term ‘other comprehensive income’ to label income and expenses that are included in comprehensive income but excluded from profit or loss. IAS 1 does not require an entity to use those terms in its financial statements.

IG5 Two statements of comprehensive income are provided, to illustrate the alternative presentations of income and expenses in a single statement or in two statements. The single statement of comprehensive income illustrates the classification of income and expenses within profit or loss by function. The separate statement (in this example, ‘the income statement’) illustrates the classification of income and expenses within profit by nature.

IG6 The examples are not intended to illustrate all aspects of IFRSs, nor do they constitute a complete set of financial statements, which would also include a statement of cash flows, a summary of significant accounting policies and other explanatory information.

Part I: Illustrative presentation of financial statements

XYZ Group – Statement of financial position as at 31 December 20X7

(in thousands of currency units)

	31 Dec 20X7	**31 Dec 20X6**
ASSETS		
Non-current assets		
Property, plant and equipment	350,700	360,020
Goodwill	80,800	91,200
Other intangible assets	227,470	227,470

Investments in associates	100,150	110,770
Available-for-sale financial assets	142,500	156,000
	901,620	945,460
Current assets		
Inventories	135,230	132,500
Trade receivables	91,600	110,800
Other current assets	25,650	12,540
Cash and cash equivalents	312,400	322,900
	564,880	578,740
Total assets	1,466,500	1,524,200

XYZ Group – Statement of financial position as at 31 December 20X7

(in thousands of currency units)

	31 Dec 20X7	**31 Dec 20X6**
EQUITY AND LIABILITIES		
Equity attributable to owners of the parent		
Share capital	650,000	600,000
Retained earnings	243,500	161,700
Other components of equity	10,200	21,200
	903,700	782,900
Non-controlling interests	70,050	48,600

Short-term provisions	5,000	4,800
Total current liabilities	315,100	454,420
Total liabilities	492,750	692,700
Total equity and liabilities	1,466,500	1,524,200

XYZ Group – Statement of comprehensive income for the year ended 31 December 20X7

(illustrating the presentation of comprehensive income in one statement and the classification of expenses within profit by function)

(in thousands of currency units)

	20X7	**20X6**
Revenue	390,000	355,000
Cost of sales	(245,000)	(230,000)
Gross profit	145,000	125,000
Other income	20,667	11,300
Distribution costs	(9,000)	(8,700)
Administrative expenses	(20,000)	(21,000)
Other expenses	(2,100)	(1,200)
Finance costs	(8,000)	(7,500)
Share of profit of associates[a]	35,100	30,100

Profit before tax	161,667	128,000
Income tax expense	(40,417)	(32,000)
Profit for the year from continuing operations	121,250	96,000
Loss for the year from discontinued operations	–	(30,500)
PROFIT FOR THE YEAR	121,250	65,500
Other comprehensive income:		
Exchange differences on translating foreign operations[b]	5,334	10,667
Available-for-sale financial assets[(b)]	(24,000)	26,667
Cash flow hedges[(b)]	(667)	(4,000)
Gains on property revaluation	933	3,367
Actuarial gains (losses) on defined benefit pension plans	(667)	1,333
Share of other comprehensive income of associates[c]	400	(700)
Income tax relating to components of other comprehensive income[d]	4,667	(9,334)
Other comprehensive income for the year, net of tax	(14,000)	28,000
TOTAL COMPREHENSIVE INCOME FOR THE YEAR	107,250	93,500
Profit attributable to:		
Owners of the parent	97,000	52,400
Non-controlling interests	24,250	13,100
	121,250	65,500
Total comprehensive income attributable to:		
Owners of the parent	85,800	74,800
Non-controlling interests	21,450	18,700
	107,250	93,500

Earnings per share (in currency units):		
Basic and diluted	0.46	0.30

Alternatively, components of other comprehensive income could be presented in the statement of comprehensive income net of tax:

Other comprehensive income for the year, after tax:	**20X7**	**20X7**
Exchange differences on translating foreign operations	4,000	8,000
Available-for-sale financial assets	(18,000)	20,000
Cash flow hedges	(500)	(3000)
Gains on property revaluation	600	2,700
Actuarial gains (losses) on defined benefit pension plans	(500)	1,000
Share of other comprehensive income of associates	400	(700)
Other comprehensive income for the year, net of tax[(d)]	(14,000)	28,000

a This means the share of associates' profit attributable to owners of the associates, ie it is after tax and non-controlling interests in the associates.

b This illustrates the aggregated presentation, with disclosure of the current year gain or loss and reclassification adjustment presented in the notes. Alternatively, a gross presentation can be used.

c This means the share of associates' other comprehensive income attributable to owners of the associates, ie it is after tax and non-controlling interests in the associates.

d The income tax relating to each component of other comprehensive income is disclosed in the notes.

XYZ Group – Income statement for the year ended 31 December 20X7

Total comprehensive income for the year[b]	–	96,600	3,200	(14,400)	(400)	800	85,800	21,450	107,250
Transfer to retained earnings	–	200	–	–	–	200	–	–	–
Balance at 31 December	650,000	243,500	5,600	3,200	(800)	2,200	903,700	70,050	973,750

20X7

a The amount included in retained earnings for 20X6 of 53,200 represents profit attributable to owners of the parent of 52,400 plus actuarial gains on defined benefit pension plans of 800 (1,333, less tax 333, less non-controlling interests 200). The amount included in the translation, available-for-sale and cash flow hedge reserves represent other comprehensive income for each component, net of tax and non-controlling interests, eg other comprehensive income related to available-for-sale financial assets for 20X6 of 16,000 is 26,667, less tax 6,667, less non-controlling interests 4,000. The amount included in the revaluation surplus of 1,600 represents the share of other comprehensive income of associates of (700) plus gains on property revaluation of 2,300 (3,367, less tax 667, less non-controlling interests 400). Other comprehensive income of associates relates solely to gains or losses on property revaluation.

b The amount included in retained earnings for 20X7 of 96,600 represents profit attributable to owners of the parent of 97,000 plus actuarial losses on defined benefit pension plans of 400 (667, less tax 167, less non-controlling interests 100). The amount included in the translation, available-for-sale and cash flow hedge reserves represent other comprehensive income for each component, net of tax and non-controlling interests, eg other comprehensive income related to the translation of foreign operations for 20X7 of 3,200 is 5,334, less tax 1,334, less non-controlling interests 800. The amount included in the revaluation surplus of 800 represents the share of other comprehensive income of associates of 400 plus gains on property revaluation of 400 (933, less tax 333, less non-controlling interests 200). Other comprehensive income of associates relates solely to gains or losses on property revaluation.

Part II: Illustrative example of the determination of reclassification adjustments

IG7 The Standard requires an entity to disclose reclassification adjustments relating to each component of other comprehensive income.

IG8 This guidance provides an illustration of the calculation of reclassification adjustments for available-for-sale financial assets recognised in accordance with IAS 39.

IG9 On 31 December 20X5, XYZ Group purchased 1,000 shares (equity instruments) at 10 currency units (CU) per share, classified as available for sale. The fair value of the instruments at 31 December 20X6 was CU12; at 31 December 20X7 the fair value had increased to CU15. All of the instruments were sold on 31 December 20X7; no dividends were declared on those instruments during the time that they were held by XYZ Group. The applicable tax rate in accordance with IAS 12 *Income Taxes* is 30 per cent.

Calculation of gains

(in currency units)

	Before tax	Income tax	Net of tax
Gains recognised in other comprehensive income:			
Year ended 31 December 20X6	2,000	(600)	1,400
Year ended 31 December 20X7	3,000	(900)	2,100
Total gain	5,000	(1,500)	3,500

Amounts reported in profit or loss and other comprehensive income for the years ended 31 December 20X6 and 31 December 20X7

	20X7	20X6
Profit or loss:		
Gain on sale of instruments	5,000	
Income tax expense	(1,500)	
Net gain recognised in profit or loss	3,500	
Other comprehensive income:		
Gain arising during the year, net of tax	2,100	1,400
Reclassification adjustment, net of tax	(3,500)	–
Net gain (loss) recognised in other comprehensive income	(1,400)	1,400
	2,100	1,400

Alternatively, components of other comprehensive income may be shown gross of tax with a separate line item for tax effects:

	20X7	20X6
Profit or loss:		
Gain on sale of instruments	5,000	
Income tax expense	(1,500)	
Net gain recognised in profit or loss	3,500	
Other comprehensive income:		
Gain arising during the year	3,000	2,000
Reclassification adjustment	(5,000)	–
Income tax relating to other comprehensive income	600	(600)
Net gain (loss) recognised in other comprehensive income	(1,400)	1,400
	2,100	1,400

Part III: Illustrative examples of capital disclosures (paragraphs 134–136)
An entity that is not a regulated financial institution

IG10 The following example illustrates the application of paragraphs 134 and 135 for an entity that is not a financial institution and is not subject to an externally imposed capital requirement. In this example, the entity monitors capital using a debt-to-adjusted capital ratio. Other entities may use different methods to monitor capital. The example is also relatively simple. An entity decides, in the light of its circumstances, how much detail it provides to satisfy the requirements of paragraphs 134 and 135.

Facts

Group A manufactures and sells cars. Group A includes a finance subsidiary that provides finance to customers, primarily in the form of leases. Group A is not subject to any externally imposed capital requirements.

Example disclosure

The Group's objectives when managing capital are:

- to safeguard the entity's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The Group sets the amount of capital in proportion to risk. The Group manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

Consistently with others in the industry, the Group monitors capital on the basis of the debt-to-adjusted capital ratio. This ratio is calculated as net debt ÷ adjusted capital. Net debt is calculated as total debt (as shown in the statement of financial position) less cash and cash equivalents. Adjusted capital comprises all components of equity (ie share capital, share premium, non-controlling interests, retained earnings, and revaluation reserve) other than amounts accumulated in equity relating to cash flow hedges, and includes some forms of subordinated debt.

During 20X4, the Group's strategy, which was unchanged from 20X3, was to maintain the debt-to-adjusted capital ratio at the lower end of the range 6:1 to 7:1, in order to secure access to finance at a reasonable cost by maintaining a BB credit rating. The debt-to-adjusted capital ratios at 31 December 20X4 and at 31 December 20X3 were as follows:

	31 Dec 20X4	**31 Dec 20X3**
	CU million	**CU million**
Total debt	1,000	1,100
Less: cash and cash equivalents	(90)	(150)
Net debt	910	950
Total equity	110	105
Add: subordinated debt instruments	38	38

Less: amounts accumulated in equity relating to cash flow hedges	(10)	(5)
Adjusted capital	138	138
Debt-to-adjusted capital ratio	6.6	6.9

The decrease in the debt-to-adjusted capital ratio during 20X4 resulted primarily from the reduction in net debt that occurred on the sale of subsidiary Z. As a result of this reduction in net debt, improved profitability and lower levels of managed receivables, the dividend payment was increased to CU2.8 million for 20X4 (from CU2.5 million for 20X3).

An entity that has not complied with externally imposed capital requirements

IG11 The following example illustrates the application of paragraph 135(e) when an entity has not complied with externally imposed capital requirements during the period. Other disclosures would be provided to comply with the other requirements of paragraphs 134 and 135.

Facts

Entity A provides financial services to its customers and is subject to capital requirements imposed by Regulator B. During the year ended 31 December 20X7, Entity A did not comply with the capital requirements imposed by Regulator B. In its financial statements for the year ended 31 December 20X7, Entity A provides the following disclosure relating to its non-compliance.

Example disclosure

Entity A filed its quarterly regulatory capital return for 30 September 20X7 on 20 October 20X7. At that date, Entity A's regulatory capital was below the capital requirement imposed by Regulator B by CU1 million. As a result, Entity A was required to submit a plan to the regulator indicating how it would increase its regulatory capital to the amount required. Entity A submitted a plan that entailed selling part of its unquoted equities portfolio with a carrying amount of CU11.5 million in the fourth quarter of 20X7. In the fourth quarter of 20X7, Entity A sold its fixed interest investment portfolio for CU12.6 million and met its regulatory capital requirement.

Appendix
Amendments to guidance on other IFRSs

The following amendments to guidance on other IFRSs are necessary in order to ensure consistency with the revised IAS 1. In the amended paragraphs, new text is underlined and deleted text is struck through.

* * * * *

The amendments contained in this appendix when IAS 1 was revised in 2007 have been incorporated into the guidance on the relevant IFRSs, published in this volume.

Table of Concordance

This table shows how the contents of IAS 1 (revised 2003 and amended in 2005) and IAS 1 (as revised in 2007) correspond. Paragraphs are treated as corresponding if they broadly address the same matter even though the guidance may differ.
